DOCUMENT INFORMATION	
Document Title	Campus Management System (CMS) Undergraduate MBBS
Owner	Director IT
Version	1.0
Status	Approved
Prepared by	Hafiz Muhammad Mudassir, Developer (Software & Web)
Approved by	Vice Chancellor
Date released	May 05, 2021
Classification	Rawalpindi Medical University

TECHNICAL PROPOSAL	
Problem Statement	The Campus Management System (CMS) at Rawalpindi Medical University (RMU) is essential to transition from manual processes to a modern, digitalized approach. This initiative will address current inefficiencies, improve data management, enhance communication, and optimize resource utilization, ultimately leading to a more effective and responsive educational environment.
Scope of Work	The proposed system will include all aspects of undergraduate educational activities, integrating both academic and clinical faculty members of RMU who are involved in the educational process.
Objectives	1. To streamline administrative and academic processes. 2. To enhance communication and collaboration among students, faculty, and staff. 3. To provide real-time access to information and services. 4. To improve the overall efficiency of campus operations.
Technical Specifications	The CMS is built on a multi-tier architecture, consisting of: 1. **Presentation Layer**: The user interface, accessible via web browsers and mobile applications. 2. **Application Layer**: The core functionality, including business logic and process management. 3. **Data Layer**: The database management system (DBMS) that stores and retrieves data. The system uses a combination of technologies such as: - **Front-end**: HTML, CSS, JavaScript, and modern frameworks like Bootstrap. - **Back-end**: Server-side languages PHP and modern framework like Yii 2. - **Database**: Relational databases like MySQL maria DB.
Implementation Plan	**Phase 1: Planning and Requirement Analysis** - Communicate all departments to gather detailed requirements - Define project scope, objectives, and deliverables - Develop a detailed project plan with timelines and milestones **Phase 2: System Design** - Design the system architecture and data models - Create wireframes and prototypes for user interfaces - Define integration points with existing systems **Phase 3: Development and Testing** - Develop system modules using Agile methodology ○ Student Registration

	o Faculty Registration
	   o E-Cards Management
	   o Admission
	   o Verification and Registration
	   o Academic Module
	   o Schedule and Timetable
	   o Attendance
	   o Assessment
	   o Examination
	   o Reporting
	• Conduct unit, integration, and system testing
	• Perform user acceptance testing (UAT) with a group of end-users
	
	## Phase 4: Deployment and Training
	
	• Deploy the system in a staged approach (e.g., pilot phase followed by full rollout)
	• Provide training sessions for end users
	• Offer ongoing support and maintenance
	
	Phase 5: Maintenance and Support
	
	Monitoring: Continuous monitoring of system performance and security.
	
	Support: Establishment of support desk at RMU and via support email.
	
	Updates: Regular updates to the system for improvements and security patches.

Budgetary Arrangements	RMU own Resources, Annual IT Budget
Risk Management	**User Adoption:** Deliver thorough training and support to facilitate a seamless transition. **System Downtime:** Establish redundancy and failover mechanisms to minimize operational disruptions. **Data Security:** Implement robust security measures such as encryption and multi-factor authentication to prevent breaches.

SUMMARY OF SYSTEM IMPLEMENTATION AND IMPACT ANALYSIS	
System Title	Campus Management System (CMS) Undergraduate
Implementation Status	Successful
Implementation Date	December 01, 2021
Proposed by	RMU IT Team
Application Specification Areas	Software Engineering, SDLC, Programming Logic, Coding, Application Framework, RDBMS, Software Development.
Supervised by	Hafiz Shahid Rasool (Director IT)
Target Users	Faculty, Students, Module Supervisors, Admission, HR, Administration
Impact Area	Public Sector University (Government of Pakistan)
Current Status	Implemented
Executing Department	Department of Information Technology
Impact Analysis & Conclusion	The implementation of a campus management system at Rawalpindi Medical University (RMU) has automated key academic processes from admission to examination, significantly improving data accuracy and yielding a positive environmental impact. Since its deployment in 01-12-2021, the system has offered automated solutions for faculty and students to monitor their activities through a user-friendly dashboard. With its robust architecture and strong security measures, the system ensures a reliable and efficient management of academic processes, contributing to the smooth functioning of the university. A CMS can transform the management of campus operations, leading to a more effective and engaging environment for students, faculty, and staff.
