## University Moto, Vision, Values & Goals

### RMU Motto

### Mission Statement

To impart evidence-based research-oriented health professional education in order to provide best possible patient care and inculcate the values of mutual respect, ethical practice of healthcare and social accountability.

### Vision and Values

Highly recognized and accredited centre of excellence in Medical Education, using evidence-based training techniques for development of highly competent health professionals, who are lifelong experiential learner and are socially accountable.

### Goals of the Undergraduate Integrated Modular Curriculum

The Undergraduate Integrated Learning Program is geared to provide you with quality medical education in an environment designed to:

- Provide thorough grounding in the basic theoretical concepts underpinning the practice of medicine.
- Develop and polish the skills required for providing medical services at all levels of the health care delivery system.
- Help you attain and maintain the highest possible levels of ethical and professional conduct in your future life.
- Kindle a spirit of inquiry and acquisition of knowledge to help you attain personal and professional growth & excellence.

13.	Focal Person Quran Translation Lectures	Dr. Fahad Anwar			
14.	Focal Person Family Medicine	Dr. Sadia Khan			

## Module IV- Blood and Immunity Module

### Rationale

Blood is a specialized connective tissue that delivers necessary substances such as nutrients and oxygen to the cells and transports metabolic waste products away from those same cells.. Blood accounts for 8% of the human body weight. The average adult has a blood volume of roughly 5 liters, composed of plasma and several kinds of cells (occasionally called corpuscles); these formed elements of the blood are erythrocytes (red blood cells, RBCs), leukocytes (white blood cells), and thrombocytes (platelets). By volume, the red blood cells constitute about 45% of whole blood, the plasma about 54.3%, and white cells about 0.7%. White blood cells are part of the body's immune system; they destroy and remove old or aberrant cells and cellular debris, as well as attack infectious agents (pathogens) and foreign substances.

The rationale behind is to introduce the students the basic constituents, functions and transport of various substances through blood.

### Module Outcomes

By the end of the module, students will be able to:

### **Knowledge**

- This module is expected to build students basic knowledge about normal structure, organization, functions and development of blood and immunity system.
- Used technology based Medical Education including.  
**Artificial Intelligence**
- Appreciate concept and importance of  
**Biomedical Ethics,**  
**Research**  
**Family Medicine**

### **Skills**

- Demonstrate effective skill for performing and interpreting various laboratory tests like Haemin crystal test.
- Demonstrate awareness of ethical, legal and social implecation of issues related to bioethics.

### **Attitude**

- Demonstrate **professional attitude, team-building spirit and good communication specially in small group discussions.**

This module will run in 5 weeks duration. Instructional strategies are given in the timetable and learning objectives are given in the study guides. Study guides will be uploaded on the university website. Good luck!

## **SECTION - I**

### **Terms & Abbreviations**

- Domains of Learning
  - Teaching and Learning
- Methodologies/Strategies
- Large Group Interactive Session (LGIS)
  - Small Group Discussion (SGD)
  - Self-Directed Learning (SDL)
  - Case Based Learning (CBL)
  - Problem- Based Learning (PBL)
  - Skill Labs/Practicals (SKL)
- Table1. Domains of learning according to Blooms Taxonomy
  - Figure 1. Prof Umar’s Model of Integrated Lecture
  - Table2. Standardization of teaching content in Small Group Discussions
  - Table 3. Steps of taking Small Group Discussions
  - Figure 2. PBL 7 Jumps Model

**Table1. Domains of Learning According to Blooms Taxonomy**

Sr. #	Abbreviation	Domains of learning
1.	C	<b>Cognitive Domain:</b> knowledge and mental skills.

	• C1	Remembering
	• C2	Understanding
	• C3	Applying
	• C4	Analyzing
	• C5	Evaluating
	• C6	Creating
2.	P	<b>Psychomotor Domain:</b> motor skills.
	• P1	Imitation
	• P2	Manipulation
	• P3	Precision
	• P4	Articulation
	• P5	Naturalization
3.	A	<b>Affective Domain:</b> feelings, values, dispositions, attitudes, etc
	• A1	Receive
	• A2	Respond
	• A3	Value
	• A4	Organize
	• A5	Internalize

**Learning Methodologies / Strategies**

**Large Group Interactive Session (LGIS)**

The large group interactive session is structured format of Prof Umar Model of Integrated lecture. It will the followed for delivery of all LGIS. The lecturer will introduce a topic or common clinical condition and explains the underlying phenomena through questions, pictures, videos of patients, interviews, and exercises, etc. Students are actively involved in the learning process.

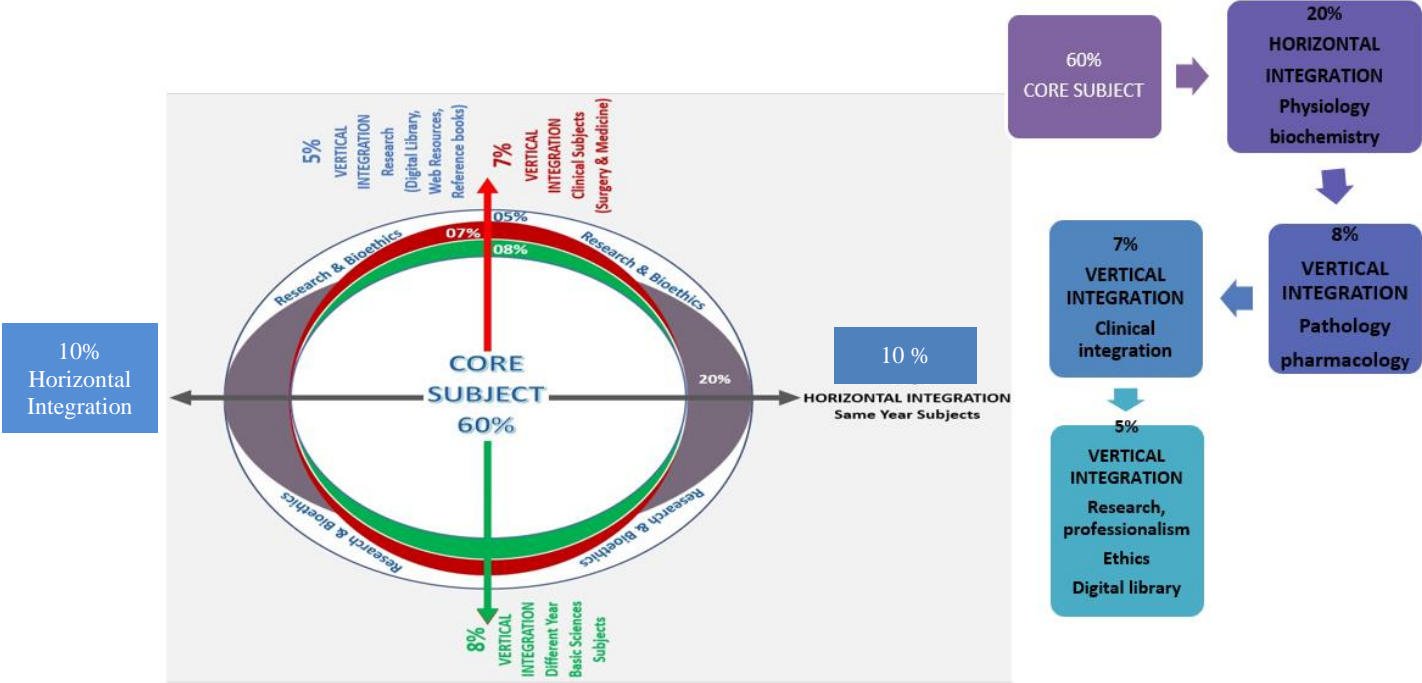

Figure 1. Prof Umar's Model of Integrated Lecture

## Small Group Discussion (SGD)

This format helps students to clarify concepts acquire skills and attitudes. Sessions are structured with the help of specific exercises such as patient case, interviews or discussion topics or power point presentations. Students exchange opinions and apply knowledge gained from lectures, SGDs and self study. The facilitator role is to ask probing questions, summarize and help to clarify the concepts.

**Table 2. Standardization of teaching content in Small Group Discussions**

S. No	Topics	Approximate %
1	Title Of SGD	
2	Learning Objectives from Study Guides	
3	Horizontal Integration	5%+5%=10%
4	Core Concepts of the topic	60%
5	Vertical Integration	20%
6	Related Advance Research points	3%
7	Related Ethical points	2%

**Table 3. Steps of Implementaion of Small Group Discussions**

Step 1	Sharing of Learning objectives by using students Study guides	First 5 minutes
Step 2	Asking students pre-planned questions from previous teaching session to develop co-relation (these questions will be standardized)	5minutes
Step 3	Students divided into groups of three and allocation of learning objectives	5minutes
Step 4	ACTIVITY: Students will discuss the learning objectives among themselves	15 minutes
Step 5	Each group of students will present its learning objectives	20 min
Step 6	Discussion of learning content in the main group	30min
Step 7	Clarification of concept by the facilitator by asking structured questions from learning content	15 min
Step 8	Questions on core concepts	
Step 9	Questions on horizontal integration	
Step 10	Questions on vertical integration	
Step 11	Questions on related research article	
Step 12	Questions on related ethics content	
Step 13	Students Assessment on online MS teams (5 MCQs)	5 min
Step 14	Summarization of main points by the facilitator	5 min
Step 15	Students feedback on the SGD and entry into log book	5 min
Step 16	Ending remarks	

**Self Directed Learning (SDL)**

- Self- directed learning is a process where students take primary charge of planning, continuing, and evaluating their learning experiences.
- Time Home assignment
- Learning objectives will be defined
- Learning resources will be given to students = Textbook (page no), web site
- Assessment:
  - i Will be online on LMS (Mid module/ end of Module)
  - ii.OSPE station

**Case Based Learning (CBL)**

- It’s a learner centered model which engages students in discussion of specific scenarios that typically resemble real world examples.
- Case scenario will be given to the students
- Will engage students in discussion of specific scenarios that resemble or typically are real-world examples.
- Learning objectives will be given to the students and will be based on
  - i. To provide students with a relevant opportunity to see theory in practice
  - ii. Require students to analyze data in order to reach a conclusion.
  - iii. Develop analytic, communicative, and collaborative skills along with content knowledge.

**Problem Based Learning (PBL)**

- Problem-based learning (PBL) is a student-centered approach in which students learn about a subject by working in groups to solve an open-ended problem.
- This problem is what drives the motivation and the learning.

The 7- Jump-Format of PBL (Masstricht Medical School)		
Step 7	Synthese & Report	Session - II
Step 6	Collect Information from outside	
Step 5	Generate learning Issues	Session - I
Step 4	Discuss and Organise Ideas	
Step 3	Brainstorming to Identify Explanations	
Step 2	Define the Problem	
Step 1	Clarify the Terms and Concepts of the Problem Scenario	
Problem- Scenario		

**Figure 2. PBL 7 Jumps Model**

Practical Sessions/Skill Lab (SKL)

Practical Session/ Skill Lab (SKL)	
Demonstration/ power point presentation 4-5 slide	10-15 minutes
Practical work	25-30 minutes
Write/ draw and get it checked by teacher	20-25 minutes
05 mcqs at the end of the practical	10 minutes
At the end of module practical copy will be signed by head of department	
At the end of block the practical copy will be signed by	
Head of Department	
Dean	
Medical education department	
QEC

- Small Group Discussions
  - Anatomy (SGD)
  - Physiology (SGD)
  - Biochemistry (SGD)
- Self Directed Topic, Learning Objectives & References
  - Anatomy (SDL)
  - Physiology (SDL)
  - Biochemistry (SDL)
- Skill Laboratory
  - Anatomy
  - Physiology
  - Biochemistry

## Horizontally Integrated Basic Sciences (Anatomy, Physiology & Biochemistry)

### Anatomy Large Group Interactive Session (LGIS)

Topic	At the End of The Session Students Should Be Able To:	Learning Domain	Teaching Strategy	Assessment Tools
(Histology) Lymph node	• Classify lymphoid tissue	C2	LGIS	MCQ SAQ VIVA
	• Define diffuse lymphoid tissue, nodular lymphoid tissue and lymphoid organs	C1		
	• Discuss the histological features of lymph node	C2		
	• Enlist functions of lymph node	C1		
	• Understand the supporting elements of lymph node	C2		
	• Describe filtration through lymph node	C2		
	• Discuss importance of high endothelial venules in lymph node	C2		
	• Discuss the clinical correlation of lymph node	C3		
	• Correlate the clinical conditions	C3		
	• Understand the preventive and curative health care measures	C3		
	• Practice the principles of Bioethics	C3		
	• Apply strategic use of AI in health care	C3		
	• Read a research article	C3		
(Histology) Thymus & Tonsil	• Describe the location and functions of thymus	C1	LGIS	MCQ SAQ VIVA
	• Enumerate different types of reticuloepithelial cells	C1		
	• Describe microscopic structure of thymus	C2		
	• Compare the histological structure of thymus and other lymphoid organs	C2		
	• Discuss blood thymus barrier	C2		
	• Describe general histological structure of tonsils	C2		
	• Differentiate palatine, lingual, and pharyngeal tonsils histologically	C2		
	• Discuss the clinical correlation of thymus	C3		
	• Correlate the clinical conditions	C3		
	• Understand the preventive and curative health care measures	C3		
	• Practice the principles of Bioethics	C3		
	• Read a research article	C3		

(Histology) Spleen	• Describe the location and functions of spleen	C2	LGIS	MCQ SAQ VIVA
	• Describe microscopic structure of spleen	C2		
	• Differentiate between red and white pulp of spleen	C2		
	• Discuss blood circulation through spleen	C2		
	• Discuss the clinical correlation of spleen	C3		
	• Correlate the clinical conditions	C3		
	• Understand the preventive and curative health care measures	C3		
	• Practice the principles of Bioethics	C3		
	• Read a research article	C3		
(Embryology) Development of Pharyngeal arches & pouches	• Define pharyngeal arches and pouches	C1	LGIS	MCQ SAQ VIVA
	• Discuss the components of pharyngeal arches and pouches	C2		
	• Describe the development and fate of each pharyngeal arch and pouches	C2		
	• Discuss the clinical correlation of pharyngeal arches and pouches	C3		
	• Correlate the clinical conditions	C3		
	• Understand the preventive and curative health care measures	C3		
	• Practice the principles of Bioethics	C3		
	• Read a research article	C3		

### Physiology Large Group Interactive Session (LGIS)

Topics	At the end of lecture students should be able to:	Learning Domains	Teaching Strategy	Assessment Tools		
Composition of blood & Hemopoiesis	1.Describe composition and general functions of blood 2.Explain the role of bone marrow in hemopoiesis and erythropoiesis 3.Draw steps of hemopoiesis 4. Define committed and uncommitted cells	1.C2 2. C2 3. C3 4. ### Biochemistry Large Group Interactive Session (LGIS)

Topics	At the end of lecture students should be able to	Learning Domain	Teaching Strategy	Assessment Tool
Blood	• Enlist various functions performed by blood.	C1	LGIS	MCQs SAQs
	• Describe Composition of blood.	C2		
Structure of hemoglobin and myoglobin	• Describe Structure of hemoglobin	C2	LGIS	MCQs SAQs
	• Describe structure of myoglobin.	C2		
	• Discuss Biochemical roles of hemoglobin and myoglobin.	C2		
Types of Hemoglobin	• Enlist various types of Hemoglobin.	C1	LGIS	MCQs SAQs
	• Describe Importance of heme and globin components	C2		
	• Interpret importance of HbA1c in diagnosis of Diabetes	C3		
Oxygen dissociation curve.	• Discuss Importance of oxygen dissociation curve.	C2	LGIS	MCQs SAQs
	• Enlist various factors affecting the curve.	C1		
Abnormalities in Hemoglobin.	• Elaborate congenital abnormalities in structure of Hemoglobin.	C2	LGIS	MCQs SAQs
	• Enlist Structural defects of hemoglobin	C1		
	• Discuss Preventive measures.	C2		
Hemoglobinopathies	• Discuss hemoglobinopathies.	C2	LGIS	MCQs SAQs
	• Enlist Types of thalassemia.	C1		
	• Discuss Familial counseling.	C2		
	• Elaborate Preventive measures.	C2		
Heme synthesis	• Describe enzymatic regulation of heme synthesis	C2	LGIS	MCQs SAQs
Porphyria	• Discuss various types of porphyria	C2		
Breakdown of hemoglobin	• Elaborate steps in the breakdown of hemoglobin.	C2	LGIS	MCQs SAQs
	• Describe Steps in synthesis of Bilirubin	C2		
Jaundice.	• Recall Normal level of S. Bilirubin.	C1	LGIS	MCQs SAQs
	• Define jaundice.	C1		
	• Recall normal level of Bilirubin	C1		
	• Enlist types of Jaundice.	C1		

	<ul style="list-style-type: none"> <li>Describe Biochemical tests to distinguish various types of jaundice.</li> </ul>	C2	LGIS	
	<ul style="list-style-type: none"> <li>. Describe Physiological Jaundice</li> </ul>	C2		
Plasma proteins	<ul style="list-style-type: none"> <li>Describe plasma proteins.</li> </ul>	C2	LGIS	MCQs SAQs
	<ul style="list-style-type: none"> <li>Discuss Biochemical role of various plasma proteins.</li> </ul>	C2		
	<ul style="list-style-type: none"> <li>Recall normal levels of plasma proteins</li> </ul>	C1		
	<ul style="list-style-type: none"> <li>Illustrate Role of A/G ratio.</li> </ul>	C3		
Acute phase proteins & Albumin	<ul style="list-style-type: none"> <li>Enlist various proteins raise in inflammation.</li> </ul>	C1	LGIS	MCQs SAQs
	<ul style="list-style-type: none"> <li>Describe Role of albumin.</li> </ul>	C2		
	<ul style="list-style-type: none"> <li>Discuss Role of C- reactive protein.</li> </ul>	C2		
Haptoglobin and transferrin	<ul style="list-style-type: none"> <li>Describe Structure of Haptoglobin and transferrin.</li> </ul>	C2	LGIS	MCQs SAQs
	<ul style="list-style-type: none"> <li>Discuss biochemical Role of Haptoglobin and transferrin.</li> </ul>	C2		
Ferritin and hemosiderin	<ul style="list-style-type: none"> <li>Describe biochemical role of ferritin and hemosiderin.</li> </ul>	C2	LGIS	MCQs SAQs
	<ul style="list-style-type: none"> <li>Describe Hemosiderosis.</li> </ul>	C2		
Ceruloplasmin.	<ul style="list-style-type: none"> <li>Describe biochemical role of ceruloplasmin.</li> </ul>	C2	LGIS	MCQs SAQs
	<ul style="list-style-type: none"> <li>Discuss Wilson's disease.</li> </ul>	C2		
Iron	<ul style="list-style-type: none"> <li>Recall Sources of iron.</li> </ul>	C1	LGIS	MCQs SAQs
	<ul style="list-style-type: none"> <li>Describe Transport and absorption of iron.</li> </ul>	C2		
	<ul style="list-style-type: none"> <li>Discuss hyper and hypo functions of iron.</li> </ul>	C2		
Immunoglobulins	<ul style="list-style-type: none"> <li>Describe Structure of Immunoglobulin.</li> </ul>	C2	LGIS	MCQs SAQs
	<ul style="list-style-type: none"> <li>Discuss biochemical role of various Immunoglobulin.</li> </ul>	C2		
	<ul style="list-style-type: none"> <li>Elaborate Class switching.</li> </ul>	C2		
AIDs	<ul style="list-style-type: none"> <li>Define AIDs</li> </ul>	C1	LGIS	MCQs SAQs
	<ul style="list-style-type: none"> <li>Describe Immunological defects in AIDs.</li> </ul>	C2		
	<ul style="list-style-type: none"> <li>Discuss various preventive measures.</li> </ul>	C2		
Folic acid.	<ul style="list-style-type: none"> <li>Recall Sources of folic acid.</li> </ul>	C1	LGIS	MCQs SAQs
	<ul style="list-style-type: none"> <li>Discuss deficiency effects of folic acid</li> </ul>	C2		
	<ul style="list-style-type: none"> <li>Describe biochemical role of folic acid.</li> </ul>	C2		
	<ul style="list-style-type: none"> <li>Recall Recommended Dietary allowance.</li> </ul>	C1		
Vitamin B12	<ul style="list-style-type: none"> <li>Recall Sources of Vitamin B12</li> </ul>	C1	LGIS	MCQs SAQs
	<ul style="list-style-type: none"> <li>Describe biochemical role of vitamin B12</li> </ul>	C2		
	<ul style="list-style-type: none"> <li>Discuss Deficiency effects of B12</li> </ul>	C2		

### Anatomy Small Group Discussion (SGDs)

Topic	At the End Of The Session Students Should Be Able To:	Learning Domains	Teaching Strategy	Assessment Tools
Posterior Compartment of Leg (muscles) and flexor retinaculum	• Illustrate cutaneous innervation	C2	SGD, Skill Lab	MCQ SAQ VIVA OSPE
	• Describe superficial fascia & deep fascia.	C2		
	• Discuss superficial and deep muscle groups in posterior compartment	C2		
	• Tabulate origin, insertion, nerve supply and action of all muscles of posterior compartment of leg	C2		
	• Discuss ruptured calcaneal tendon, calcaneal bursitis and accessory soleus muscle	C3		
	• Correlate the clinical conditions	C3		
	• Understand the preventive and curative health care measures	C3		
	• Practice the principles of Bioethics	C3		
	• Apply strategic use of AI in health care	C3		
	• Read a research article	C3		
Posterior Compartment of Leg (Neurovascular organization)	• Describe origin, course relations, branches and tributaries of neurovascular bundle	C2	SGD, Skill Lab	MCQ SAQ VIVA OSPE
	• Discuss superficial veins i.e long and short saphenous veins	C2		
	• Palpate the posterior tibial pulse	C3		
	• Correlate the clinical conditions	C3		
	• Understand the preventive and curative health care measures	C3		
	• Practice the principles of Bioethics	C3		
	• Apply strategic use of AI in health care	C3		
	• Read a research article	C3		
Bones of Foot	• Enumerate the bones of foot	C1	SGD, Skill Lab	MCQ SAQ VIVA OSPE
	• Identify different bones of foot	C1		
	• Discuss bony features and muscle attachment	C2		
	• Discuss fracture of metatarsals and os trigonum, avascular necrosis of head of talus	C3		
	• Correlate the clinical conditions	C3		
	• Understand the preventive and curative health care measures	C3		
	• Practice the principles of Bioethics	C3		

	• Apply strategic use of AI in health care	C3		
	• Read a research article	C3		
Dorsum of foot	• Tabulate muscle on the dorsal aspect of foot	C2	SGD, Skill Lab	MCQ SAQ VIVA OSPE
	• Describe blood supply and nerve supply	C2		
	• Discuss cutaneous innervation of dorsum of foot	C2		
	• Palpate the dorsalis pedis artery on dorsum of foot	C3		
	• Discuss other clinicals related to the dorsum of the foot	C3		
	• Correlate the clinical conditions	C3		
	• Understand the preventive and curative health care measures	C3		
	• Practice the principles of Bioethics	C3		
	• Apply strategic use of AI in health care	C3		
	• Read a research article	C3		
Ankle Joint	• Describe the articular surfaces of ankle joint	C2	Skill Lab	MCQ SAQ VIVA OSPE
	• Describe the attachment of capsule	C2		
	• Enumerate the ligaments	C1		
	• Discuss the movements possible at ankle joint and muscles producing them	C2		
	• Discuss ankle sprain	C3		
	• Discuss different types of ankle injuries	C3		
	• Correlate the clinical conditions	C3		
	• Understand the preventive and curative health care measures	C3		
	• Practice the principles of Bioethics	C3		
	• Apply strategic use of AI in health care	C3		
	• Read a research article	C3		
Joints of Foot	• Classify the joints of foot	C2	SGD, Skill Lab	MCQ SAQ VIVA OSPE
	• Discuss the articular surfaces, joint capsules, ligaments, movements and muscles producing movements	C2		
	• Discuss major ligaments in detail	C2		
	• Discuss tibial nerve entrapment	C3		
	• Discuss club foot, claw foot and other clinical conditions	C3		
	• Correlate the clinical conditions	C3		
	• Understand the preventive and curative health care measures	C3		
	• Practice the principles of Bioethics	C3		
	• Apply strategic use of AI in health care	C3		

	• Read a research article	C3		
Sole of foot (Muscles)	• Identify Surface landmarks	C1	SGD, Skill Lab	MCQ SAQ VIVA OSPE
	• Describe cutaneous innervation of sole of foot	C2		
	• Describe Plantar aponeurosis its attachments	C2		
	• Discuss flexor retinaculum	C2		
	• Discuss muscles in different layers of foot with origin, insertion, nerve supply and actions	C2		
	• Correlate the clinical conditions	C3		
	• Understand the preventive and curative health care measures	C3		
	• Practice the principles of Bioethics	C3		
	• Apply strategic use of AI in health care	C3		
	• Read a research article	C3		
Sole of foot (Neurovascular Organization)	• Enlist nerves and arteries present in sole of foot	C1	SGD, Skill Lab	MCQ SAQ VIVA OSPE
	• Discuss route and relations of neurovascular bundle in sole of foot	C2		
	• Describe the formation of vascular arches of foot along with clinicals	C2, C3		
	• Discuss plantar fasciitis	C3		
	• Correlate the clinical conditions	C3		
	• Understand the preventive and curative health care measures	C3		
	• Practice the principles of Bioethics	C3		
	• Apply strategic use of AI in health care	C3		
	• Read a research article	C3		
Arches of Foot and Gait Cycle	• Classify the arches of foot	C2	SGD, Skill Lab	MCQ SAQ VIVA OSPE
	• Describe different components of arches of foot	C2		
	• Discuss stability factors of arches of foot	C2		
	• Discuss pes planus (flat foot), club foot and other clinicals	C3		
	• Discuss gait cycle and its stages	C2		
	• Correlate the clinical conditions	C3		
	• Understand the preventive and curative health care measures	C3		
	• Practice the principles of Bioethics	C3		
	• Apply strategic use of AI in health care	C3		
	• Read a research article	C3		
Thymus, Tonsils	• Describe location of thymus and tonsils	C2		MCQ
	• Discuss anatomical features of thymus and tonsils	C2		

	• Describe blood supply, venous drainage and lymphatic drainage of thymus and tonsils	C2	SGD, Skill Lab	SAQ VIVA OSPE
	• Enumerate functions of thymus and tonsils	C1		
	• Correlate the clinical conditions	C3		
	• Understand the preventive and curative health care measures	C3		
	• Practice the principles of Bioethics	C3		
	• Apply strategic use of AI in health care	C3		
	• Read a research article	C3		
Spleen	• Discuss the location of spleen	C2	SGD, Skill Lab	MCQ SAQ VIVA OSPE
	• Enumerate anatomical relations of spleen	C1		
	• Discuss blood supply, venous drainage and lymphatic drainage of spleen	C2		
	• Correlate the clinical conditions	C3		
	• Understand the preventive and curative health care measures	C3		
	• Practice the principles of Bioethics	C3		
	• Apply strategic use of AI in health care	C3		
Radiology, Surface Anatomy & Cross Sectional Anatomy	• Read a research article	C3	SGD, Skill Lab	MCQ SAQ VIVA OSPE
	• Identify different structures on radiographs	C3		
	• Demonstrate the surface anatomy of various structures present in posterior compartment of leg and foot	P		
	• Demonstrate the surface anatomy of spleen, thymus and tonsils	P		
	• Discuss the Cross-Sectional anatomy at the level of leg & foot	C2		
	• Correlate the clinical conditions	C3		
	• Understand the preventive and curative health care measures	C3		
	• Practice the principles of Bioethics	C3		
	• Apply strategic use of AI in health care	C3		
	• Read a research article	C3		

### Physiology Small Group Discussion (SGDs)

Topics	At the end of discussion students should be able to:	Learning Domains	Teaching Strategy	Assessment Tools
Functions & composition of blood, Hemopoiesis and Bone marrow	1.Describe composition and general functions of blood 2.Explain the role of bone marrow in hemopoiesis and erythropoiesis 3.Draw steps of hemopoiesis 4. Define committed and uncommitted cells 5.Correlate basic knowledge with clinical application	1.C2 2. C2 3. C3 4. C1 5.C3	SGD	MCQ SEQ VIVA VOCE MCQ (LMS based Assessment, MST based Assessment) OSPE
Hemoglobin & Hemoglobinopathies, Iron Metabolism	1.Discuss details about iron metabolism in body including iron absorption and storage 2.Understand the structure, synthesis and functions of hemoglobin and its types 3.Enlist different types of hemoglobinopathies 4.Correlate basic knowledge with clinical application	C2 C2 C1 C3	SGD	MCQ SEQ VIVA VOCE MCQ (LMS based Assessment, MST based Assessment) OSPE
Platelet formation & function. hemostasis, blood coagulation tests (BT, CT, PT, APTT and INR)	1. Explain thrombocytopenia 2. Describe functions of platelets 3. Define hemostasis 4. Explain steps of hemostasis 5. Correlate basic knowledge with clinical application	C2 C2 C1 C2 C3	SGD	MCQ SEQ VIVA VOCE MCQ (LMS based Assessment, MST based Assessment) OSPE
Physiological mechanism of temperature regulation	1. Explain Concept of temperature 2. Discuss Physiological mechanism of temperature regulation 3. Correlate basic knowledge with clinical application	C2 C2 C3	SGD	MCQ SEQ VIVA VOCE MCQ (LMS based Assessment, MST based Assessment) OSPE
Stages of Erythropoiesis Factors	1. Elaborate Morphological features of RBCs 2. Describe the stages of production of RBCs 3. Recall Life span of RBCs	C2 C1 C1 C2	SGD	MCQ SEQ VIVA VOCE

Affecting Erythropoiesis (First week)	4. Enumerate and explain factors which affect erythropoiesis 5. Enlist sites of production of erythropoietin 6. Describe recombinant erythropoietin 7. Explain mechanism of release and action of erythropoietin	C1 C2 C2		MCQ (LMS based Assessment, MST based Assessment) OSPE
Physiology of WBC (third week)	1. Enumerate and explain various types of leukocytes and steps of leucopoiesis 2. Explain the characteristics and functions 3. Conditions in which these cells are increased and decreased 4. Leukemias and their effects on the body	C1/C2 C2 C2 C2	SGD	MCQ SEQ VIVA VOCE MCQ (LMS based Assessment, MST based Assessment) OSPE
Physiology of platelets (Fourth week)	1. Explain thrombocytopenia 2. Describe functions of platelets 3. Define hemostasis 4. Explain steps of hemostasis	C2 C2 C1 C2	SGD	MCQ SEQ VIVA VOCE MCQ (LMS based Assessment, MST based Assessment) OSPE
Blood transfusion hazards. Tissue and organ transplantations (Fifth week)	1. Discuss Blood transfusion hazards. 2. Explain Effect of blood transfusion on various organs 3. Explain Tissue and organ transplantations	C2 C2 C2	SGD	MCQ SEQ VIVA VOCE MCQ (LMS based Assessment, MST based Assessment) OSPE
Disorders of temperature regulation (Fever, Heat stroke, Exposure of body to extreme cold) (Fifth week)	1. Discuss Disorders of temperature regulation 2. Explain Concept of Fever 3. Clinical correlation Of Heat Stroke	1.C2 2.C2 3.C3	SGD	MCQ SEQ VIVA VOCE MCQ (LMS based Assessment, MST based Assessment) OSPE

### Biochemistry Small Group Discussion (SGDs)

Topic	At the End of Tutorial Students Should Be Able To	Learning Domain	Teaching Strategy	Assessment Tool
Blood	• Explain structure and biomedical role of hemoglobin & Myoglobin	C2	SGD	MCQs, SAQs Viva
	• Describe oxygen dissociation curve and its significance.	C2		
	• Types of Hb	C1		
Iron	• Describe sources, structure, Biochemical role and related diseases of iron.	C2	SGD	MCQs, SAQs Viva

## Anatomy Self-Directed Learning (SDL)

Topics	Learning objectives	Learning Resources
Posterior compartment of leg and flexor retinaculum	<ul style="list-style-type: none"> <li>• Illustrate cutaneous innervation</li> <li>• Describe superficial fascia &amp; deep fascia.</li> <li>• Discuss superficial and deep muscle groups in posterior compartment</li> <li>• Tabulate origin, insertion, nerve supply and action of all muscles of posterior compartment of leg</li> <li>• Discuss ruptured calcaneal tendon, calcaneal bursitis and accessory soleus muscle</li> <li>• Correlate the clinical aspects</li> <li>• Read relevant research article</li> <li>• Use digital library</li> </ul>	<ul style="list-style-type: none"> <li>• Clinically Oriented Anatomy 9th Edition, <b>pg no.755</b></li> <li>• <a href="https://www.youtube.com/watch?v=Bj4c7wGdIwc&amp;pp=ygUTY29tcGFydG1lbnRzIG9mIGxlZw%3D%3D">https://www.youtube.com/watch?v=Bj4c7wGdIwc&amp;pp=ygUTY29tcGFydG1lbnRzIG9mIGxlZw%3D%3D</a></li> <li>• <a href="https://www.sciencedirect.com/science/article/abs/pii/S1440244004800343">https://www.sciencedirect.com/science/article/abs/pii/S1440244004800343</a></li> <li>• </li> </ul>
Neurovascular organization of posterior compartment of leg	<ul style="list-style-type: none"> <li>• Describe origin, course relations, branches and tributaries of neurovascular bundle</li> <li>• Discuss superficial veins i.e long and short saphenous veins</li> <li>• Palpate the posterior tibial pulse</li> <li>• Discuss clinical correlation related to venous return in leg</li> <li>• Correlate the clinical aspects</li> <li>• Read relevant research article</li> <li>• Use digital library</li> </ul>	<ul style="list-style-type: none"> <li>• Clinically Oriented Anatomy 9th Edition, <b>pg no. 755</b></li> <li>• <a href="https://www.youtube.com/watch?v=Bj4c7wGdIwc&amp;pp=ygUTY29tcGFydG1lbnRzIG9mIGxlZw%3D%3D">https://www.youtube.com/watch?v=Bj4c7wGdIwc&amp;pp=ygUTY29tcGFydG1lbnRzIG9mIGxlZw%3D%3D</a></li> <li>• <a href="https://www.mdpi.com/2077-0383/11/21/6448">https://www.mdpi.com/2077-0383/11/21/6448</a></li> </ul>
Foot Joints	<ul style="list-style-type: none"> <li>• Classify the joints of foot</li> <li>• Discuss the articular surfaces, joint capsules, ligaments, movements and muscles producing movements</li> <li>• Discuss major ligaments in detail</li> <li>• Discuss tibial nerve entrapment</li> <li>• Discuss club foot, claw foot and other clinical conditions</li> <li>• Correlate the clinical aspects</li> <li>• Read relevant research article</li> <li>• Use digital library</li> </ul>	<ul style="list-style-type: none"> <li>• Clinically Oriented Anatomy 9th Edition, <b>pg no. 808</b></li> <li>• <a href="https://www.youtube.com/watch?v=Ex9KzkAYN-8&amp;pp=ygUKZm9vdCBqb2ludA%3D%3D">https://www.youtube.com/watch?v=Ex9KzkAYN-8&amp;pp=ygUKZm9vdCBqb2ludA%3D%3D</a></li> <li>• <a href="https://www.ncbi.nlm.nih.gov/pmc/articles/PMC3180294/">https://www.ncbi.nlm.nih.gov/pmc/articles/PMC3180294/</a></li> </ul>

Ankle joint	<ul style="list-style-type: none"> <li>• Describe the attachment of capsule</li> <li>• Enumerate the ligaments</li> <li>• Discuss the movements possible at ankle joint and muscles producing them</li> <li>• Discuss ankle sprain</li> <li>• Discuss different types of ankle injuries</li> <li>• Correlate the clinical aspects</li> <li>• Read relevant research article</li> <li>• Use digital library</li> </ul>	<ul style="list-style-type: none"> <li>• Clinically Oriented Anatomy 9th Edition, <b>pg no. 806</b></li> <li>• <a href="https://www.youtube.com/watch?v=Ex9KzkAYN-8&amp;pp=ygUKZm9vdCBqb2ludA%3D%3D">https://www.youtube.com/watch?v=Ex9KzkAYN-8&amp;pp=ygUKZm9vdCBqb2ludA%3D%3D</a></li> <li>• <a href="https://www.ncbi.nlm.nih.gov/pmc/articles/PMC3414868/">https://www.ncbi.nlm.nih.gov/pmc/articles/PMC3414868/</a></li> </ul>
Sole of foot	<ul style="list-style-type: none"> <li>• Identify Surface landmarks</li> <li>• Describe cutaneous innervation of sole of foot</li> <li>• Describe Plantar aponeurosis its attachments</li> <li>• Discuss flexor retinaculum</li> <li>• Discuss muscles in different layers of foot with origin, insertion, nerve supply and actions</li> <li>• Correlate the clinical aspects</li> <li>• Read relevant research article</li> <li>• Use digital library</li> </ul>	<ul style="list-style-type: none"> <li>• Clinically Oriented Anatomy 9th Edition, <b>pg no. 768-781</b></li> <li>• <a href="https://www.youtube.com/watch?v=JorGDBbPzI&amp;pp=ygUcc29sZSBvZiBmb290IGFuYXRvbXkgbGVjdHVyZQ%3D%3D">https://www.youtube.com/watch?v=JorGDBbPzI&amp;pp=ygUcc29sZSBvZiBmb290IGFuYXRvbXkgbGVjdHVyZQ%3D%3D</a></li> <li>• <a href="https://www.ncbi.nlm.nih.gov/pmc/articles/PMC3311689/">https://www.ncbi.nlm.nih.gov/pmc/articles/PMC3311689/</a></li> </ul>
Spleen	<ul style="list-style-type: none"> <li>• Discuss the location of spleen</li> <li>• Enumerate anatomical relations of spleen</li> <li>• Discuss blood supply, venous drainage and lymphatic drainage of spleen</li> <li>• Discuss clinical correlations of spleen with special reference to splenectomy</li> <li>• Correlate the clinical aspects</li> <li>• Read relevant research article</li> <li>• Use digital library</li> </ul>	<ul style="list-style-type: none"> <li>• Clinically Oriented Anatomy 9th Edition, <b>pg no. 487</b></li> <li>• <a href="https://www.youtube.com/watch?v=3K5I6MMDA8M&amp;pp=ygUOc3BsZWVuIGFuYXRvbXk%3D">https://www.youtube.com/watch?v=3K5I6MMDA8M&amp;pp=ygUOc3BsZWVuIGFuYXRvbXk%3D</a></li> <li>• <a href="https://www.sciencedirect.com/science/article/pii/S0046817782802232">https://www.sciencedirect.com/science/article/pii/S0046817782802232</a></li> </ul>

### Physiology Self-Directed Learning (SDL)

Topics Of SDL	Learning Objectives	Learning Resources
<b>ON CAMPUS</b> Platelet formation & function. hemostasis, blood coagulation tests (BT, CT, PT, APTT and INR)	1. Explain thrombocytopenia 2. Describe functions of platelets 3. Define hemostasis <ul style="list-style-type: none"> <li>Explain steps of hemostasis</li> </ul>	<ul style="list-style-type: none"> <li>Ganong's Review of Medical Physiology.25<sup>TH</sup> Edition. Section 05, (Chapter 31, Page 564) (Chapter 03, Page 79)</li> <li>Human Physiology by Dee Unglaub Silver thorn. 8<sup>TH</sup> Edition. (Chapter 16, Page 558)</li> <li>Physiological Basis of Medical Practice by Best &amp; Taylor's.13<sup>th</sup> Edition. (Chapter 24, Page 413)</li> <li>Textbook of Medical Physiology by Guyton &amp; Hall.14<sup>th</sup> Edition. Section 06. (Chapter 37, Page 477,487)</li> <li><a href="https://my.clevelandclinic.org/health/symptoms/21999-hemostasis">https://my.clevelandclinic.org/health/symptoms/21999-hemostasis</a></li> <li><a href="https://www.sciencedirect.com/topics/neuroscience/hemostasis">https://www.sciencedirect.com/topics/neuroscience/hemostasis</a></li> </ul>
Concept of intravascular anticoagulants and bleeding disorders (Vit K deficiency, hemophilia and thrombocytopenia)	1. Explain Intravascular coagulation 2. Discuss Bleeding disorders <ul style="list-style-type: none"> <li>Enlist Types of hemophilia</li> </ul>	<ul style="list-style-type: none"> <li>Ganong's Review of Medical Physiology.25<sup>TH</sup> Edition. Section 05, (Chapter 31, Page 566)</li> <li>Physiological Basis of Medical Practice by Best &amp; Taylor's.13<sup>th</sup> Edition. (Chapter 24, page 427)</li> <li>Textbook of Medical Physiology by Guyton &amp; Hall.14<sup>th</sup> Edition. (Chapter 37, Page 484)</li> <li><a href="https://youtu.be/unp3vGsxIIA">https://youtu.be/unp3vGsxIIA</a></li> <li><a href="https://www.hematology.org/education/patients/bleeding-disorders">https://www.hematology.org/education/patients/bleeding-disorders</a></li> </ul>
<b>(OFF CAMPUS):</b> Composition of blood	1.Describe composition and general functions of blood 2.Explain the role of bone marrow in hemopoiesis and erythropoiesis 3.Draw steps of hemopoiesis <ul style="list-style-type: none"> <li>4. Define committed and uncommitted cells</li> </ul>	<ul style="list-style-type: none"> <li>Ganong's Review of Medical Physiology.25<sup>TH</sup> Edition. Section 05, Cardiovascular Physiology (Chapter 31, Page 553)</li> <li>Human Physiology by Dee Unglaub Silver thorn. 8<sup>TH</sup> Edition. (Chapter 16, Page 547,548)</li> <li>Physiological Basis of Medical Practice by Best &amp; Taylor's.13<sup>th</sup> Edition. Section 03, Blood (Chapter 19, Page 347) (Chapter 20, Page 356)</li> <li>Textbook of Medical Physiology by Guyton &amp; Hall.14<sup>th</sup> Edition. Red blood cells, Anemia and Polycythemia. Section 06. (Chapter 33, Page 439)</li> <li>1. <a href="https://accessmedicine.mhmedical.com/content.aspx?bookid=3047&amp;sectionid=255121548">https://accessmedicine.mhmedical.com/content.aspx?bookid=3047&amp;sectionid=255121548</a></li> <li>2.<a href="https://youtu.be/cm8IK24RRvA">https://youtu.be/cm8IK24RRvA</a></li> </ul>

Function of Plasma Proteins	<p>1.Enumerate plasma proteins, their properties, sites of productions and their functions</p> <p>2.Explain effects of deficiency of plasma proteins</p> <ul style="list-style-type: none"> <li>3.Discuss conditions associated with decreased production and increased excretion of plasma proteins</li> </ul>	<ul style="list-style-type: none"> <li>Ganong's Review of Medical Physiology.25<sup>TH</sup> Edition. ### Histology Practicals Skill Laboratory (SKL)

Topic	At the End of The Session Students Should Be Able To:	Learning Domains	Teaching Strategy	Assessment Tools
Lymph node	• Identify lymph node under microscope	P	Skill Lab	OSPE
	• Focus the slide	P		
	• Draw the histological structure of lymph node	C2		
	• Enlist two identification points of lymph node	C1		
Thymus	• Identify the slide of thymus under light microscope	P	Skill Lab	OSPE
	• Focus the slide	P		
	• Draw the histological structure of thymus	C2		
	• Enlist two identifications points of thymus	C1		
Spleen	• Identify the slide of spleen under light microscope	P	Skill Lab	OSPE
	• Focus the slide	P		
	• Draw histological structure of spleen,	C2		
	• Enlist two identification points of spleen	C1		
Tonsils	• Identify the slide of tonsils under light microscope	P	Skill Lab	OSPE
	• Focus the slide	P		
	• Draw histological structure of tonsils	C2		
	• Write two identification points of tonsils	C1		

### Physiology Practicals Skill Laboratory (SKL)

Topic	Learning Objectives	Learning Domains	Learning Strategy	Assessment Tools
Determination of Rh blood group	<ul style="list-style-type: none"> <li>• Principle</li> <li>• Procedure</li> <li>• Methods</li> <li>• Types of blood groups</li> <li>• Clinical Correlations of blood transfusion</li> </ul>	C1/C3 A3 P3	Practical/skill lab	Viva Voce OSPE Video Assisted Assessment
Determination of Clotting time (CT)	<ul style="list-style-type: none"> <li>• Procedure</li> <li>• Clinical importance</li> <li>• Recall Normal values</li> </ul>	C1/C3 A3 P3	Practical/skill lab	Viva Voce OSPE Video Assisted Assessment
Determination of Bleeding time (BT)	<ul style="list-style-type: none"> <li>• Procedure</li> <li>• Clinical importance</li> <li>• Recall Normal values</li> </ul>	C1/C3 A3 P3	Practical/skill lab	Viva Voce OSPE Video Assisted Assessment
Recording of Body Temperature	<ul style="list-style-type: none"> <li>• Principle</li> <li>• Procedure</li> <li>• Methods</li> <li>• Clinical Correlations</li> </ul>	C1/C3 A3 P3	Practical/skill lab	Viva Voce OSPE Video Assisted Assessment
Reference: Saqib Practical Copy First Year				

### Biochemistry Practical Skill Laboratory (SKL)

Topic	At the End of Practical Students Should Be Able To	Learning Domain	Teaching Strategy	Assessment Tool
Draw of Blood Technique	<ul style="list-style-type: none"> <li>How to draw blood</li> </ul>	P	Skill Lab	OSPE
Quantitative Estimation of Serum Total Proteins	<ul style="list-style-type: none"> <li>Perform estimation of serum Protein</li> <li>Describe Principal, method, normal blood level and clinical significance of S. Proteins</li> </ul>	P	Skill Lab	OSPE
Hemin crystals Technique to draw blood	<ul style="list-style-type: none"> <li>Describe Preparation, shape and clinical significance of hemin crystals Illustrate Method and precautions to draw blood.</li> </ul>	P	Skill Lab	OSPE
Estimation of S. Bilirubin	<ul style="list-style-type: none"> <li>Perform estimation of serum bilirubin</li> <li>Describe Principal, method, normal blood level and clinical significance of S. Bilirubin</li> </ul>	P	Skill Lab	OSPE

## **SECTION - III**

### **Basic and Clinical Sciences (Vertical Integration)**

#### **Content**

- **CBLs**
- **PBLs**
- **Vertical Integration LGIS**

## Case Based Learning Objectives (CBL)

Subjects	Topics	At the end of the session the student should be able to	Learning Domains
Anatomy	• Ankle sprain	Apply basic knowledge of subject to study clinical case.	C3
	• Flat foot	Apply basic knowledge of subject to study clinical case.	C3
Physiology	• Anemia	Apply basic knowledge of subject to study clinical case	C3
Biochemistry	• Thalassemia	Apply basic knowledge of subject to study clinical case.	C3
	• Jaundice	Apply basic knowledge of subject to study clinical case.	C3

## Vertical Integration LGIS

### Pathology

Topic	At the End of Lecture Students Should Be Able To	Learning Domain	Teaching Strategy	Assessment Tool
Mediators of Inflammation	• Define inflammation	C1	LGIS	MCQ
	• Classify inflammation	C2		
	• Classify mediators of inflammation	C2		
	• Cell derived Plasma derived			
	• Describe general features of mediators of inflammation	C1		

**Medicine**

Topic	At the End of Lecture Students Should Be Able To	Learning Domain	Teaching Strategy	Assessment Tool
Jaundice	• Discuss Jaundice.	C2	LGIS	MCQs
	• Discuss various Types and Subtypes of Jaundice.	C2		
	• Discuss the signs and symptoms of a patient with Jaundice due to various Causes.	C2		
	• Discuss the workup for diagnosis of different type of Jaundice	C2		
	• Discuss Treatment of Various Causes of Jaundice.	C2		
	• Discuss the diagnostic workup and treatment.	C2		
	• Define Heat Stroke.	C1		
	• Discuss the clinical Presentation of Heat Stroke.	C2		
	• Discuss the diagnostic workup and management.	C2		

**Obstetrics & Gynecology**

Topic	At the End of Lecture Students Should Be Able To	Learning Domain	Teaching Strategy	Assessment Tool
Rh incompatibility and its significance	• Know the basic pathophysiology of Rh sensitization	C2	LGIS	MCQs
	• Describe the fetal effects of Rh isoimmunization	C2		
	• Understand signs of fetal anemia	C2		
	• Describe role of Anti-D antibodies in prevention of Rh isoimmunization	C2

## **SECTION – IV**

### **Spiral Courses**

#### **Content**

- **Longitudinal Themes**
  - **The Holy Quran Translation**
  - **Family Medicine**
  - **Biomedical Ethics & Professionalism**
  - **Early Clinical Exposure (ECE)**

## Introduction to Spiral Courses

### The Holy Quran Translation

A course of Islamic Studies provides students with a comprehensive overview of the fundamental aspects of Islam, its history, beliefs, practices, and influence on society and familiarize students with a solid foundation in understanding the religion of Islam from an academic and cultural perspective. Ethics, in integrated form will shape the core of the course to foster among students the universal ethical values promoted by Islam.

### Bioethics

Biomedical ethics, also known as bioethics, is a field of study that addresses the ethical, social, and legal issues arising from medicine and the life sciences. It applies moral principles and decision-making frameworks to the practice of clinical medicine, biomedical research, and health policy. Biomedical ethics seeks to navigate the complex ethical dilemmas posed by advances in medical technology, research methodologies, and healthcare practices. Key areas of focus include patient rights and autonomy, confidentiality, informed consent, end-of-life care, resource allocation, and the ethics of genetic engineering, among others.

Biomedical ethics within medical universities plays a pivotal role in shaping the moral framework through which future healthcare professionals navigate the complex and often challenging decisions they will face in their careers. This critical discipline integrates ethical theories and principles with clinical practice, research, and healthcare policy, fostering a deep understanding of the ethical dimensions of medicine. By embedding biomedical ethics into the curriculum, Rawalpindi medical university equips students with the tools to critically analyze and address ethical dilemmas, ranging from patient confidentiality and informed consent to end-of-life care and the equitable distribution of healthcare resources.

This education goes beyond theoretical knowledge, encouraging students to apply ethical reasoning in practical scenarios, thus preparing them for the moral complexities of the medical field. Biomedical ethics also promotes a culture of empathy, respect, and integrity, ensuring that future medical practitioners not only excel in their technical skills but also uphold the highest ethical standards in patient care and research. Through seminars, case studies, and interdisciplinary collaborations, students are encouraged to engage in ethical discourse, reflecting on the societal impact of medical advancements and the responsibility of medical professionals to society. This foundational aspect of medical education cultivates a generation of healthcare professionals committed to ethical excellence, patient advocacy, and the pursuit of equitable healthcare for all.

### Professionalism

Professionalism in medicine refers to the set of values, behaviors, and relationships that underpin the trust the public has in doctors and other healthcare professionals. It encompasses a commitment to competence, integrity, ethical conduct, accountability, and putting the interests of patients above one's own. Professionalism involves adhering to high standards of practice, including maintaining patient confidentiality, communicating effectively and respectfully with patients and colleagues, and continually engaging in self-improvement and professional development. It also includes a responsibility to improve access to high-quality healthcare and to contribute to the welfare of the community and the betterment of public health. In essence, professionalism in medicine is foundational to the quality of care provided to patients and is critical for maintaining the trust that is essential for the doctor-patient relationship.

Rawalpindi Medical University emphasizes the importance of professionalism in medicine, integrating it throughout its curriculum to ensure that students embody the core values of respect, accountability, and compassion in their interactions with patients, colleagues, and the community. This focus on professionalism is designed to prepare students for the complexities of the healthcare environment, instilling in them a deep sense of responsibility to their patients, adherence to ethical principles, and a commitment to continuous learning and improvement. Through a combination of theoretical learning, practical training, and mentorship, RMU encourages its students to exemplify professionalism in every aspect of their medical practice. Workshops, seminars, and clinical rotations further reinforce these values, providing students with real-world experiences that highlight the importance of maintaining professional conduct in challenging situations. RMU's approach to professionalism not only shapes competent and ethical medical professionals but also contributes to the broader mission of improving healthcare standards and patient outcomes. By prioritizing professionalism, Rawalpindi Medical University plays a crucial role in advancing the medical profession and ensuring that its graduates are well-equipped to meet the demands of a rapidly evolving healthcare landscape with honor and integrity.

### Communication Skills

Communication skill for health professionals involves the ability to effectively convey and receive information, thoughts, and feelings with patients, their families, and other healthcare professionals. It encompasses a range of competencies including active listening, clear and compassionate verbal and non-verbal expression, empathy, the ability to explain medical conditions and treatments in an understandable way, and the skill to negotiate and resolve conflicts. Effective communication is essential for establishing trust, ensuring patient understanding and compliance with treatment plans, making informed decisions, and providing holistic care. It directly impacts patient satisfaction, health outcomes, and the overall efficiency of healthcare delivery.

At Rawalpindi Medical University (RMU), the development of communication skills is regarded as a fundamental aspect of medical education, recognizing its critical importance in enhancing patient care, teamwork, and interdisciplinary collaboration. RMU is dedicated to equipping its students with exceptional communication abilities, enabling them to effectively interact with patients, their families, and healthcare colleagues. The curriculum is thoughtfully designed to incorporate various interactive and experiential learning opportunities, such as role-playing, patient interviews, and group discussions, which allow students to practice and refine their communication skills in a supportive environment.

By integrating communication skills training throughout its programs, RMU not only enhances the interpersonal competencies of its future healthcare professionals but also contributes to improving the overall quality of healthcare delivery. Graduates from RMU are distinguished not just by their clinical expertise but also by their ability to connect with patients and colleagues, making them highly effective and compassionate practitioners.

### Behavioral Sciences

Behavioral sciences in medicine focus on understanding and addressing the psychological and social aspects of health and illness. This interdisciplinary field combines insights from psychology, sociology, anthropology, and other disciplines to enhance medical care and patient outcomes. It explores how behavior, emotions, and social factors influence health, disease, and medical treatment. By incorporating behavioral science principles into medical practice, healthcare professionals can better understand patients' perspectives, improve communication, and promote positive health behaviors, ultimately contributing to more comprehensive and effective patient care.

## Family Medicine

Family medicine is a medical specialty dedicated to providing comprehensive health care for people of all ages and genders. It is characterized by a long-term, patient-centered approach, building sustained relationships with patients and offering continuous care across all stages of life. It focuses on treating the whole person within the context of the family and the community, emphasizing preventive care, disease management, and health promotion.

The Family Medicine Curriculum at Rawalpindi Medical University (RMU) marks a significant stride towards holistic healthcare education, aiming to prepare medical graduates for the comprehensive and evolving needs of family practice. This curriculum is designed to offer a broad perspective on healthcare, focusing on preventive care, chronic disease management, community health, and the treatment of acute conditions across all ages, genders, and diseases. Emphasizing a patient-centered approach, the curriculum ensures that students develop a deep understanding of the importance of continuity of care, patient advocacy, and the ability to work within diverse community settings.

RMU's Family Medicine Curriculum integrates theoretical knowledge with practical experience. Students are exposed to a variety of learning environments, including community health centers, outpatient clinics, and inpatient settings, providing them with a well-rounded understanding of the different facets of family medicine. This hands-on approach is complemented by interactive sessions, workshops, and seminars that cover a wide range of topics from behavioral health to geriatric care, ensuring students are well-equipped to address the comprehensive health needs of individuals and families.

## Artificial Intelligence

To realize the dreams and impact of AI requires autonomous systems that learn to make good decisions. Reinforcement learning is one powerful paradigm for doing so, and it is relevant to an enormous range of tasks, including robotics, game playing, consumer modeling and healthcare. This class will provide a solid introduction to the field of reinforcement learning and students will learn about the core challenges and approaches, including generalization and exploration. Through a combination of lectures, and written and coding assignments, students will become well versed in key ideas and techniques for RL. Assignments will include the basics of reinforcement learning as well as deep reinforcement learning — an extremely promising new area that combines deep learning techniques with reinforcement learning. In addition, students will advance their understanding and the field of RL through a final project.

## Integrated Undergraduate Research Curriculum

The integrated undergraduate research curriculum (IUGRC) of RMU occupies a definite space in schedule of each of the five years in rational and incremental way. It has horizontal harmonization as well as multidisciplinary research work potentials. In the first-year teachings are more introductory & inspirational rather than instructional. The teachings explain what & why of research and what capacities are minimally required to comprehend research & undertake research. Some research dignitaries' lecture are specifically arranged for sharing their experiences and inspiring the students. Students are specifically assessed through their individual compulsory written feedback (reflection) after the scheduled teachings end.

## Entrepreneurship

Entrepreneurship is the process of designing, launching, and running a new business, which typically starts as a small enterprise offering a product, process, or service for sale or hire. It involves identifying a market opportunity, gathering resources, developing a business plan, and managing the business's operations, growth, and development.

Entrepreneurship in medical universities represents a burgeoning field where the innovative spirit intersects with healthcare to forge advancements that can transform patient care, medical education, and healthcare delivery. This unique amalgamation of medical expertise and entrepreneurial acumen empowers students, faculty, and alumni to develop groundbreaking medical technologies, healthcare solutions, and startups that address critical challenges in the health sector. By integrating entrepreneurship into the curriculum, Rawalpindi Medical university is not only expanding the traditional scope of medical education but also fostering a culture of innovation and problem-solving. This enables future healthcare professionals to not only excel in clinical skills but also in business strategies, leadership, and innovation management.

Such initiatives often lead to the creation of medical devices, digital health platforms, and therapeutic solutions that can significantly improve patient outcomes and make healthcare more accessible and efficient. Through incubators, accelerators, and partnerships with the industry, medical universities are becoming hotbeds for healthcare innovation, driving economic growth, and contributing to the broader ecosystem of medical research and entrepreneurial success.

## Digital Literacy Module

Digital literacy means having the skills one needs to live, learn, and work in a society where communication and access to information is increasingly through digital technologies like internet platforms, social media, and mobile devices.

## Early Clinical Exposure (ECE)

Early clinical exposure helps students understand the relevance of their preclinical studies by providing real-world contexts. This can enhance motivation and engagement by showing students the practical application of their theoretical knowledge. Early exposure allows students to begin developing essential clinical skills from the start of their education. This includes not only technical skills but also crucial soft skills such as communication, empathy, and professionalism. Direct interaction with patients early in their education helps students appreciate the complexities of patient care, including the psychological and social aspects of illness. Early exposure to various specialties can aid students in making informed decisions about their future career paths within medicine.

Early clinical experiences contribute to the development of a professional identity, helping students see themselves as future physicians and understand the responsibilities and ethics associated with the profession. This can help reduce the anxiety associated with clinical work by familiarizing students with the clinical environment. It can build confidence in their abilities to interact with patients and healthcare professionals. Engaging with real-life clinical situations early on encourages the development of critical thinking and problem-solving skills, which are essential for medical practice. It helps bridge the gap between theoretical knowledge and practical application, leading to a more integrated and holistic approach to medical education. It allows students to observe and understand how healthcare systems operate, including the challenges and limitations faced in different settings.: Early patient interaction emphasizes the importance of patient-centered care from the outset, underscoring the importance of treating patients as individuals with unique needs and backgrounds.

Practical experiences can enhance long-term retention of knowledge as students are able to connect theoretical learning with clinical experiences.: Early clinical experiences often involve working in multidisciplinary teams, which fosters a sense of collaboration and understanding of different roles within healthcare.

In summary, early clinical exposure in medical education is pivotal for the holistic development of medical students, providing them with a strong foundation of practical skills, professional attitudes, and a deep understanding of patient-centered care.

## Family Medicine

Topic	At the End of Lecture Students Should Be Able To	Learning Domain	Teaching Strategy	Assessment Tool
Anemia	• Define Anemia.	C1	LGIS	MCQs
	• Discuss various Types and Subtypes of Anemia.	C2		
	• Discuss the signs and symptoms of a patient with Anemia.	C2		
	• Discuss the workup for diagnosis of type of anemia.	C2		
	• Discuss Treatment of Various types of anemia.	C2		

## Biomedical Ethics

Topics	At the end of session students should be able to:	Learning Domains	Teaching Strategy	Assessment Tools
Laboratory Ethics	At the end of the session students should be able to;		Short video demonstration on violation of Ethical principle of autonomy from suit CBEC Video resources	<ul style="list-style-type: none"> <li>Assignment based assessment involving real life case scenarios under aggregate Marks (Internal Assessment)</li> <li>Assignment to be uploaded on LMS</li> </ul>
	• Understand the importance of taking permission before performing procedures (drawing blood, administering injections etc.) during laboratory sessions. <b>A1</b>	A1		
	• Show Respects other health professional team members and complete assigned task in professional manner. <b>A1</b>  • Employ collaborative negotiation to resolve conflict, anger, confusion and misunderstanding. <b>A2</b>	A2		

**Integrated Undergraduate Research Curriculum (IUGRC)**

Topics	At the end of the session the student should be able to:	Learning Domains	Teaching Strategy	Assessment Tool
Practical session 3	<p>In supervised session, after individual work sharing (PAL) on feedback and work assigned in last session (pr. session 2) on specific areas UEIH-Poster formation, students will be educated more on retrial and review of focused scientific information and extracting the relevant material for Posters: (Los): after this student will be able to</p> <ul style="list-style-type: none"><li>• Present the individual work assigned before whole group.</li><li>• Understand more, the techniques used to access, retrieve and review and source of Scientific literature</li><li>• Make search string and perform literature search using Boolean operators</li><li>• Access scientific databases and carry out an effective literature review using a number of sources or databases (PubMed).</li><li>• Hold discussions</li><li>• Refine their work towards a UEIH-Poster formation</li></ul>	C3 C3	Activity	MCQs

## SECTION - V

### Assessment Policies

#### Contents

- Assessment plan
- Types of Assessment:
- Modular Examinations
- Block Examination

**Gauge for Continuous Internal Assessment (CIA)**

Red Zone	High Alert	Yellow Zone	Green Zone	Excellent	Extra Ordinary
0 - 25%	26 - *50%	51 - 60%	61 - 70%	71 - 80%	81 - 100%

60% and above is passing marks.

**Gauge for attendance percentage**

Red Zone	High Alert	Yellow Zone-1	Yellow Zone-2	Green Zone	Excellent
0 - 25%	26 - 50%	51 - 60%	61 - 74%	*75 - 80%	81 - 100%

90% is eligibility criteria for appearing professional examination.

## Assessment plan

University has followed the guidelines of Pakistan Medical and Dental Council for assessment. Assessment is conducted at the mid modular, modular and block levels.

### Types of Assessment:

The assessment is formative and summative.

Formative Assessment	Summative Assessment
Formative assessment is taken at modular (2/3 <sup>rd</sup> of the module is complete) level through MS Teams. Tool for this assessment is best choice questions and all subjects are given the share according to their hour percentage.	Summative assessment is taken at the mid modular (LMS Based), modular and block levels.

### Modular Assessment

Theory Paper	Viva Voce
There is a module examination at the end of first module of each block. The content of the whole teaching of the module are tested in this examination. It consists of paper with objective type questions and structured essay questions. The distribution of the questions is based on the Table of Specifications of the module. (Annexure I attached)	Structured table viva voce is conducted including the practical content of the module.

### Block Assessment

On completion of a block which consists of two modules, there is a block examination which consists of one theory paper and a structured viva with OSPE.

Theory Paper	Block OSPE
There is one written paper for each subject. The paper consists of objective type questions and structured essay questions. The distribution of the questions is based on the Table of Specifications of the module.	This covers the practical content of the whole block.

**Table 4-Assessment Frequency & Time in Blood and Immunity Module**

Block	Sr #	Module – 1 Blood & Immunity Module Components	Type of Assessments	Total Assessments Time			No. of Assessments	
				Assessment Time	Summative Assessment Time	Formative Assessment Time		
Block-II	1	Weekly LMS Based Assessments (Anatomy, Physiology & Biochemistry)	Formative	2 Hours	3 Hours 45 Minutes	3 Hours	2 Formative	6 Summative
	2	End Module Examinations (SEQ, SAQ, EMQ & MCQs Based)	Summative	2 Hours				
	3	Audio Visual (AV) OSPE (10 slides) 5 minutes per slide	Summative	50 Minutes				
	4	Anatomy Structured and Clinically Oriented Viva	Summative	10 Minutes				
	5	Physiology Structured & Clinically oriented Viva voce	Summative	10 Minutes				
	6	Assessment of Clinical Lectures & Spiral Curriculums	Formative	60 Minutes

**SECTION - VI**

**Time Table**

**Integrated Clinically Oriented Modular Curriculum for First Year MBBS**

**Blood and Immunity Module Time Table**

**First Year MBBS**

**Session 2023-2024**

**Batch- 51**

## Blood and Immunity Module Team

Module Name	:	Blood and Immunity Module
Duration of module	:	05 Weeks
Coordinator	:	Dr. Rahat
Co-coordinator	:	Dr. Kamil Tahir
Reviewed by	:	Module Committee

Module Committee			Module Task Force Team		
1.	Vice Chancellor RMU	Prof. Dr. Muhammad Umar	1.	Coordinator	Dr. Rahat (APWMO of Biochemistry)
2.	Chairperson Anatomy & Dean Basic Sciences	Prof. Dr. Ayesha Yousaf	2.	DME Focal Person	Dr. Farzana Fatima
3.	Director DME	Prof. Dr. Ifra Saeed	3.	Co-coordinator	Dr. Ali Raza (Senior Demonstrator of Anatomy)
4.	Chairperson Physiology	Prof. Dr. Samia Sarwar	4.	Co-Coordinator	Dr. Uzma Zafar (APWMO of Biochemistry)
5.	Chairperson Biochemistry	Dr. Aneela Jamil	5.	Co-coordinator	Dr. Kamil Tahir (Senior Demonstrator Physiology)
6.	Focal Person Anatomy First Year MBBS	Asso. Prof. Dr. Mohtashim Hina			
7.	Focal Person Physiology	Dr. Sidra Hamid			
			DME Implementation Team		
			1.	Director DME	Prof. Dr. Ifra Saeed
8.	Focal Person Biochemistry	Dr. Aneela Jamil	2.	Assistant Director DME	Dr. Farzana Fatima
9.	Focal Person Pharmacology	Dr. Zunera Hakim	3.	Implementation Incharge 1st & 2 <sup>nd</sup> Year MBBS	Prof. Dr. Ifra Saeed Dr. Farzana Fatima Dr. Saira Aijaz
10.	Focal Person Pathology	Dr. Asiya Niazi	4.	Editor	Muhammad Arslan Aslam
11.	Focal Person Behavioral Sciences	Dr. Saadia Yasir			
12.	Focal Person Community Medicine	Dr. Afifa Kulsoom			
13.	Focal Person Quran Translation Lectures	Dr. Fahad Anwar			
14.	Focal Person Family Medicine	Dr. Sadia Khan

## Blood and Immunity Module (First Week)

### (29-07-2024 To 03-08-2024)

Date/Day	8:00am-9:20am		9:20am – 10:10am		10:10am – 10:30am	10:30am-11:20am		11:20am-12:10pm		12:10pm-12:30pm	12:30pm – 2:00pm	Home Assignments(2HRS)				
29-07-2024 MONDAY	SGD/DISSECTION				Break	PBL 1 (SESSION – I)		PHYSIOLOGY (LGIS)		Break	Practical & SGD/CBL Topics & venue mentioned at the end	SDL Physiology Composition of blood				
	Posterior Compartment of Leg & Flexor Retinaculum					PBL Team		Composition of blood & Hemopoiesis					Plasma Proteins			
								Dr Sheena (Even)					Dr. Sidra (Odd)			
30-07-2024 TUESDAY	SGD/DISSECTION					BIOCHEMISTRY (LGIS)		PHYSIOLOGY (LGIS)			Practical & SGD/CBL Topics & venue mentioned at the end	SDL Physiology Functions of plasma protein				
	Posterior Compartment of Leg (Neurovascular Organization)					Types of Hb & O2 Dissociation Curve		Heme Synthesis & Porphyrria					Plasma Proteins		Composition of blood & Hemopoiesis	
						Dr. Kashif (Even)		Dr. Romessa (Odd)					Dr. Sidra (Even)		Dr Sheena (Odd)	
31-07-2024 WEDNESDAY	SGD/DISSECTION					PHYSIOLOGY (LGIS)		PHYSIOLOGY (LGIS)			Practical & SGD/CBL Topics & venue mentioned at the end	SDL Biochemistry Structure of hemoglobin, Types of Hb & O2 Dissociation Curve				
	Bones of the foot					Stages of erythropoiesis & factors affecting erythropoiesis		WBCs classification & formation. Neutrophils, Eosinophils & Basophils and their properties					WBCs classification & formation. Neutrophils, Eosinophils & Basophils and their properties		Stages of erythropoiesis & factors affecting erythropoiesis	
						Dr. Sidra (Even)		Dr Sheena (Odd)					Dr Sheena (Even)		Dr. Sidra (Odd)	
01-08-2024 THURSDAY	PATHOLOGY (LGIS)		PBL 1 (SESSION – II)			BIOCHEMISTRY (LGIS)		PHYSIOLOGY (LGIS)			Practical & SGD/CBL Topics & venue mentioned at the end	SDL Anatomy Bones of Foot				
	Mediators of inflammation		PBL Team			Heme Synthesis & Porphyrria		Types of Hb and structure of Hb and myoglobin					Monocytes - macrophage system & lymphocytes		Hemoglobin & Hemoglobinopathies, IronMetabolism	
						Dr. Romessa (Even)		Dr. Kashif (Odd)					Prof. Dr. Samia Sarwar / Dr. Sheena (Even)		Dr. Sidra (Odd)	
02-08-2024 FRIDAY	8:00 AM – 9:00 AM		9:00 AM – 10:00AM		10:00AM– 11:00AM		11:00AM—12:00PM		Biochemistry SDL Heme Synthesis & Porphyrria							
	FAMILY MEDICINE		QURAN TRANSLATION		BIOCHEMISTRY (LGIS)		PHYSIOLOGY (LGIS)									
	Anemia		Muaamlaat-3		Muaasharat-1		Hemoglobinopathies				Degradation & Jaundice		Hemoglobin & Hemoglobinopathies, Iron Metabolism		Monocytes - macrophage system & lymphocytes	
	Dr. Umer Daraz (Even)	Dr. Iqra (Odd)	Mufti Naeem (Even)	Abdul Wahid (Odd)	Dr Uzma Zafar (Even)	Dr. Aneela (Odd)	Dr. Sidra (Even)	Prof. Dr. Samia Sarwar / Dr. Sheena(Odd)								
03-08-2024 SATURDAY	SGD/DISSECTION				Break	ANATOMY (LGIS)		SDL		Break	Practical & SGD/CBL Topics & venue mentioned at the end	SDL Anatomy Posterior Compartment of Leg				
	Dorsum of Foot (Muscles and Neurovascular Organization)					Development of pharyngeal arches							Development and histology of Lymph node			
						Prof. Dr. Ayesha Yousaf (even)							Dr. Mohtasham Hina (Associate prof.) (odd)			

Table No. 1 (Time: 12:20pm – 02:00pm)

### Schedule for LMS Based Weekly Online Assessments for First Year MBBS (Blood & Immunity Module)

The online assessment for Blood & Immunity Module for First Year MBBS will be as per following schedule:

Class	Module	Day & Date	Time of Assessment	Focal person	Department Responsible
First Year MBBS	Blood & Immunity Module	Monday 12 <sup>th</sup> August ,2024	7:00 pm- 7:30pm	Prof. Dr Ayesha Yousaf	Anatomy
		Tuesday 13 <sup>th</sup> August ,2024	7:00 pm- 7:30pm	Prof. Dr Samia Sarwar	Physiology
		Wednesday 15 <sup>th</sup> August,2024	7:00 pm- 7:30pm	Dr Aneela Jamil	Biochemistry
		Monday 19 <sup>th</sup> August,2024	7:00 pm- 7:30pm	Prof. Dr Ayesha Yousaf	Anatomy
		Tuesday 20 <sup>th</sup> August,2024	7:00 pm- 7:30pm	Prof. Dr Samia Sarwar	Physiology
		Thursday 21 <sup>st</sup> August,2024	7:00 pm- 7:30pm	Dr Aneela Jamil	Biochemistry
		Monday 26 <sup>th</sup> August,2024	7:00 pm- 7:30pm	Prof. Dr Ayesha Yousaf	Anatomy
		Tuesday 27 <sup>th</sup> August,2024	7:00 pm- 7:30pm	Prof. Dr Samia Sarwar	Physiology
		Thursday 28 <sup>th</sup> August,2024	7:00 pm- 7:30pm	Dr Aneela Jamil	Biochemistry

**Blood and Immunity Module (Fifth Week)**  
**(02-09-2024 To 07-09-2024)**

Date/time	9:00am - 12:00pm	12:00-02:00pm
02-09-2024 MONDAY	Assessment Week	
03-09-2024 TUESDAY		
04-09-2024 WEDNESDAY		
05-09-2024 THURSDAY		
06-09-2024 FRIDAY		
07-09-2024 SATURDAY		

Note: Timetable Subject to Change According To The Current Circumstances

(Logistic details of Assessments will be notified separately)

SECTION VII

Table of Specification (TOS) For Blood & Immunity Module Examination for First Year MBBS

Domains: C-Core Subject (70%) Levels C1-C2, HV- Horizontal & Vertical Integration (20%) Levels C2-C3, S- Spiral Integration (10%) Levels C2-C3

## Table of Specification for Gross OSPE

### Anatomy

Block II- Lower Limb						
1	Bones and Joints of Hip and thigh Region	30%	50%	20%	3	
2	Muscles and Neurovascular of Hip				3	
3	Muscles and Neurovascular of Anterior and medial Compartment of Thigh				3	
4	Muscles and Neurovascular of Posterior Compartment of Thigh				3	
5	Bones and Joints of knee and leg				3	
6	Muscles and Neurovascular of Anterior Compartment of Leg				3	
7	Muscles and Neurovascular of Lateral and Posterior Compartment				3	
8	Bones and Joints of ankle and Foot				3	
9	Muscles and Neurovascular of Foot				3	
10	Radiology of Lower Limb				3	
					<b>Total</b>	<b>30</b>

## Table of Specification for Integrated OSPE

### Anatomy

Block II- MSK-II and Blood & Immunity						
Development of Musculoskeletal System, vertebral column, and limbs					3	
Development of Lymphoid Organs	30%	50%	20%	3		
Microscopic anatomy of muscle and skin				3		
Microscopic anatomy of Lymphoid Organs				3		
Practical Copy				3		
					<b>Total</b>	<b>15</b>

## Physiology

Block – II (MSK-II & Blood Module)						
1.	Block – II (MSK-II & Blood Module)	Determination of Total leukocyte Count (TLC)				1 A 1
2.		Estimation of Red Blood Cell (RBC) count				1 B 1
3.		Determination of platelet count				1 C 1
4.		Determination of Differentiate leukocyte Count (DLC)	30%	50%	20%	2 3
5.		Determination of ABO blood groups				3 A 1.5
6.		Determination of Rh blood groups				3 B 1.5
7.		Determination of Clotting Time (CT)				4 A 1.5
8.		Determination of Bleeding Time (BT)				4 B 1.5
9.		Recording of body temperature				5 A 1.5
10.		Demonstration of Triple response				5 B 1.5
11.		Practical notebook / sketch copy				6 3
Total						18

## Biochemistry

	Block – II (MSK-II & Blood Module)	Color test for amino acids(observed)	90%	10%	1	2
1.	Block – II (MSK-II & Blood Module)	Biuret test and ninhydrin	100%		2	2
2.		Quantitative estimation of serum total proteins			1B	1
3.		Heat coagulation	100%		2A	1
4.		Paper chromatography			2B	1
5.		Blood draw technique	100%		3	2
6.		Quantitative estimation of serum bilirubin	100%		4	2
7.		Hemin crystal				
8.		instruments	90%	10%	4	2
9.	Practical notebook	80%	20%	5	2	
Total						10

## **Annexure I**

**(Sample MCQ, SAQ, SEQ Papers, AV OSPE, OSPE)**

**Note:** These sample papers aim to facilitate comprehension. However, it's important to note that the content and format of actual assessment papers may differ.

**RAWALPINDI MEDICAL UNIVERSITY, RWP**  
**ANATOMY DEPARTMENT**  
**1<sup>st</sup> Year MBBS MCQs Module Exam (BLOOD & IMMUNITY)**

1. A 21-year-old boy had a motorcycle accident. On x-ray groove in the lower surface of the cuboid bone was destroyed. Which of the following muscle tendons is most likely damaged?

- a. Flexor hallucis longus
- b. Peroneus brevis
- c. Peroneus longus
- d. Tibialis anterior
- e. Tibialis posterior

**Note: MCQs on USMLE Pattern**

3. A patient reported to hospital with the complaint of difficulty in walking and pain in the left leg. He gave history of an audible snap during a forceful push-off emergency car breaks (plantarflexion with the knee extended). It was followed immediately by sudden calf pain and dorsiflexion of the foot. He might be suffering from?

- a. Calcaneal tendinitis
- b. Ruptured calcaneal tendon
- c. Gastrocnemius strain
- d. Common peron

**Note: MCQs on USMLE Pattern**

5. Student of first year was asked to auscultate the posterior tibial pulse during assessment. While auscultating which landmarks are important?

- a. Between lateral malleolus and medial border of calcaneal tendon
- b. Between medial malleolus and medial border of calcaneal tendon
- c. Between lateral malleolus and lateral border of calcaneal tendon
- d. Between 1st and 2nd metatarsals
- e. Between 2nd and 3rd metatarsals

2. A professional runner without any history of trauma complaint of pain in the sole of foot and heel. The pain was aggravated during start of walk and after sitting but relieved after 5-10 minutes of activity. His condition could be due to

- a. Deep infection of the foot
- b. Plantar fasciitis
- c. Fatigue
- d. Arthritis of ankle joint
- e. Sprain of the ankle joint

**Note: MCQs on USMLE Pattern**

4. During medical examination, students were asked to examine patient with “tarsal tunnel syndrome”. Which of the following symptoms are commonly associated with this?

- a. Sharp pain radiating down the front of the thigh.
- b. Tingling and numbness along the lateral side of the foot.
- c. Weakness during ankle joint extension
- d. Burning sensation along the inner side of leg and sole of the foot.
- e. Flattening of lateral arch of the foot

**RAWALPINDI MEDICAL UNIVERSITY, RWP**  
**ANATOMY DEPARTMENT**  
**1<sup>st</sup> Year MBBS SEQs Module Exam (BLOOD & IMMUNITY)**

Q. 1 .A patient presents with an enlarged spleen (splenomegaly), and a histological examination is requested to understand the underlying changes.

- a. How would you assess the histological changes in the spleen associated with splenomegaly? (3)
- b. What alterations might you expect in the red pulp and white pulp of the spleen in response to splenomegaly? (3)
- c. How would you differentiate between reactive hyperplasia and pathological changes in the splenic tissues? (3)

Q. 2. What specific histological features would indicate the presence of an underlying disease, such as infections or hematological disorders, in the context of splenomegaly? A patient presents with swollen lymph nodes, and a biopsy is performed to investigate the cause of lymphadenopathy. The histological examination reveals atypical findings.

- a. What histological features should be examined to determine the cause of lymphadenopathy? (3)
- b. What specific histological changes might you expect in the lymph node if the cause of lymphadenopathy is an infection? (3)
- c. How can you differentiate between reactive lymphadenopathy and malignant conditions, such as lymphoma, based on histological features? (3)

**RAWALPINDI MEDICAL UNIVERSITY, RWP**  
**PHYSIOLOGY DEPARTMENT**  
**1<sup>st</sup> Year MBBS MCQs Module Exam (BLOOD & IMMUNITY)**

1. Maintenance of blood viscosity is mainly a function of :

- a. Plasma proteins
- b. Erythrocytes
- c. Thrombocytes
- d. Albumin
- e. Gamma globulins

3. A Rh-negative mother having her second pregnancy terminated because of fetal death due to Rh-incompatibility, the type of agglutinin involved in this case would be:

- a. 1gM
- b. 1gG
- c. 1gE
- d. 1gA
- e. 1gD

**Note: MCQs on USMLE Pattern**

5. When blood is allowed to clot, the fluid left behind is known as :

- a. Plasma
- b. Lymph
- c. Tissue fluid
- d. Tissue gel
- e. Serum

2. The HIV virus mainly targets the immune cells which are back bone of cell mediated immunity , these cells are:

- a. B-cells
- b. Cytotoxic T cells
- c. Helper T cells
- d. Memory cells
- e. Suppressor T cells

4. Thalasemic children usually suffer from iron over load. Insoluble storage form of iron secondary to iron-overload is termed as:

- a. Ferritin
- b. Apoferritin
- c. Hemopexin
- d. Hemosiderin
- e. Ferroheme

**Note: MCQs on USMLE Pattern**

**RAWALPINDI MEDICAL UNIVERSITY, RWP**  
**PHYSIOLOGY DEPARTMENT**  
**1<sup>st</sup> Year MBBS SEQs Module Exam (BLOOD & IMMUNITY)**

- |     |  |         |
|-----|--|---------|
| Q.1 | Discuss three different causes of anemia and what is obligatory degradation of proteins and how it can be prevented?   | (3,2)   |
| Q.2 | Define Immunity. What are different classifications of granulocytes (write any two). Write four causes of neutrophilia?  | (1,2,2) |
| Q.3 | Define Land Steiners Law, Secretors and non- Secretors. Write down briefly on Incompatible blood transfusion, stating two complications of incompatible blood transfusion. | (3,2)   |

**RAWALPINDI MEDICAL UNIVERSITY, RWP**  
**BIOCHEMISTRY DEPARTMENT**  
**1<sup>st</sup> Year MBBS SEQs Module Exam (BLOOD & IMMUNITY)**

1. Iron is transported in the body in the form of:
  - a. Ferritin
  - b. Hemosiderin
  - c. Transferrin
  - d. Hemoglobin
  - e. Myoglobin
2. The normal serum value for total bilirubin is up to:
  - a. 10mg/dl
  - b. 5mg/dl
  - c. 50mg/dl
  - d. 1mg/dl
  - e. 15mg/dl
3. Chocolate cyanosis is a classic presentation of
  - a. Thalassemia
  - b. Hemoglobin SC disease
  - c. Hemoglobin C disease
  - d. Sick cell anemia
  - e. Methemoglobinemia
4. Vitamin K is required for
  - a. Change of prothrombin into thrombin
  - b. Synthesis of prothrombin
  - c. Change of fibrinogen into fibrin
  - d. Formation of thromboplastin
  - e. Fibrinolysis

**SEQ**

- Q. a. Explain the functions of Albumin (2)
- b. Give clinical significance of Albumin. (1)
- b. Describe pathway of synthesis of heme. (2)

**RAWALPINDI MEDICAL UNIVERSITY, RWP**  
**1<sup>st</sup> Year MBBS EMQs Module Exam (BLOOD & IMMUNITY)**

Types of Anemia:

- A. Iron-deficiency anemia
- B. Vitamin B12 deficiency anemia
- C. Aplastic anemia
- D. Hemolytic anemia
- E. Sickle cell anemia
- F. Thalassemia

Descriptions:

This type of anemia is characterized by a lack of mature red blood cells due to the bone marrow failing to produce them.

Commonly caused by inadequate intake or absorption of a crucial mineral, resulting in small and pale red blood cells.

Caused by premature destruction of red blood cells, leading to a shortage of these cells in circulation.

Occurs due to a deficiency in a key vitamin required for DNA synthesis, affecting red blood cell production and neurological function.

Inherited disorder where red blood cells become crescent-shaped and rigid, leading to blockages in blood flow and oxygen delivery.

Genetic condition resulting in reduced synthesis of hemoglobin, leading to abnormal red blood cell formation and anemia.

Matching:

Type A:

Type B:

Type C:

Type D:

Type E:

Type F:

Feel free to match them accordingly:

Type A: C (Aplastic anemia)

Type B: A (Iron-deficiency anemia)

Type C: D (Hemolytic anemia)

Type D: B (Vitamin B12 deficiency anemia)

Type E: E (Sickle cell anemia)

Type F: F (Thalassemia)

**RAWALPINDI MEDICAL UNIVERSITY, RWP**  
**BIOEHTICS DEPARTMENT**  
**1<sup>st</sup> Year MBBS MCQs Module Exam (BLOOD & IMMUNITY)**

1. ----Includes rules of conduct that may be used to regulate our activities concerning the biological world.
  - a. Bio-piracy
  - b. Biosafety
  - c. Bioethics
  - d. Bio-patents
  - e. Bio-logistic
3. Following is not code of ethics.
  - a. Integrity
  - b. Objectivity
  - c. Confidentiality
  - d. Behaviour
  - e. Autonomy
5. -----Principle requiring that physicians provide, positive benefits
  - a. Justice
  - b. Autonomy
  - c. Beneficence
  - d. Veracity
  - e. Fidelity
2. The right of patients having self-decision is called.
  - a. Justice
  - b. Autonomy
  - c. Beneficence
  - d. Veracity
  - e. Fidelity
4. -----in the context of medical ethics, if it's fair and balanced
  - a. Justice
  - b. Autonomy
  - c. Beneficence
  - d. Veracity
  - e. Fidelity

**Rawalpindi Medical University Department of Anatomy**  
**Block-II OSPE 1<sup>st</sup> Year MBBS**

**Station No. 1 (Observed Station)**

Histology sketch copy will be assessed for

- a. Complete index (1)
- b. Complete and signed diagrams (1)
- c. 2 ID points mentioned with each diagram (1)
- d. Punctuality (1)
- e. Neatness (1)

**Station No. 2 (Gross Anatomy)**

Core Concept - Learning Domain (C2)

I. On the cadaver/model,

- a. Identify Red (1)
- b. Identify Yellow (1)
- c. Identify Green (1)

**Rawalpindi Medical University Department of Physiology**  
**Block-II OSPE 1<sup>st</sup> Year MBBS**

**Station No.1** Time Allowed: 2 Minutes

- a. What is the preferred dilution ratio for RBC count & platelet count? (0.5, 0.5)
- b. Write the composition of Hayem's Fluid. (1)
- c. How would you interpret a platelet count of 80,000 /mm<sup>3</sup>? (1)

**Station No.2** Time Allowed: 2 Minutes

- a. Identify the cells labeled A & B. (0.5)
- b. Points of Identification. (1.5)
- c. What is the power of objective lens used for identifying the cells and how much (0.5, 0.5)  
was the total magnification achieved?

**Rawalpindi Medical University Department of Biochemistry**  
**Block-II OSPE 1<sup>st</sup> Year MBBS**

**Station No. 2**

Time Allowed: 2 Mins

**Observed station**

Perform Biuret test 03

**Station No. 1**

Time Allowed: 2 Mins

**Observed Station**

Perform Lead Sulfide test. 03

**OSPE  
DEPARTMENT OF ANATOMY**

**Section I: Core Concept  
A. Gross Anatomy**

**Station No. 1**

**Time Allowed: 3mins**

- I. Identify Red on model/ cadaver (1)
- II. Identify Green & name the most common artery involved in Myocardial Infarction (1)

**Station No. 1 Key**

- I. Coronary Sinus
- II. Posterior Interventricular artery & LAD /LCA

**C.Vertical Integration (Cardiology)**

**Station No. 15**

**Time Allowed: 3mins**

Look at the picture given below

- I. Identify the procedure in the given image. (0.5)
- II. Name any one indication for this procedure (0.5)
- III. Give 2 sites of cardiac catheterization (01)

**OSPE  
DEPARTMENT OF BIOCHEMISTRY**

**Station 1 (Core Concept - Skill Based)**

Q1. What is the shape of haemin crystal? 1.5

Q2. What is the medicolegal importance of haemin crystal test? 1.5

**Key Station 1 (03 Marks)**

- |   |     |
|---|-----|
| 1. Rhombic shape  | 1.5 |
| 2. It can be used to differentiate between red stain and blood. | 1.5 |

**AV OSPE  
DEPARTMENT OF ANATOMY**

**Slide 1**

**Total Marks:** 05 marks

**Time Allotted:** 05 minutes

**Requirements:** Answer sheet, Pen

**Objectives:** \_\_\_\_\_

**Gross Anatomy**

- I. Identify (3)
  - A
  - B
  - C.
- II. What is the nerve supply of structure A. (1)
- III. Name the clinical condition which results due to paralysis of structure A. (1)

**AV OSPE  
DEPARTMENT OF ANATOMY**

**Slide 1**

**Total Marks:** 05 marks

**Time Allotted:** 05 minutes

**Requirements:** Answer sheet, Pen

**Objectives:** \_\_\_\_\_

**Cross Sectional Anatomy**

Identify

- A
- B
- C
- D
- E

**AV OSPE  
DEPARTMENT OF BIOCHEMISTRY**

**Slide 1**

**Total Marks:** 05 marks

**Time Allotted:** 05 minutes

**Requirements:** Answer sheet, Pen

**Objectives:** \_\_\_\_\_

Q1. What is the name of clinical condition shown in the above image? 01

Q2. What are different types? 01

Q3. causes of this condition. 01

Q4. Give Normal value of Serum bilirubin? 01

Q5. What is Kernicterus? 01
