

## Rawalpindi Medical University Plantation Information

### Burma plant

**English Name:**

Arjun Tree

**Scientific Name:**

*Terminalia acuminata*

**Family:**

Combretaceae

**Origin:**

Latin

**Importance:**

*Terminalia* is used for its wood and tannins and as a fodder. African birch is used for its wood and to make yellow dye and medicinal compounds. A yellow dyestuff produced from the leaves of *T. leiocarpa* has traditionally been used in West Africa to dye leather.

**Identified by:**

Dr. Haq Nawaz
