## DEMOGRAPHY

Demographic Transitions Population Pyramids  
Dependency Ratio Age Sex Composition

Dr. Saba Maryam  
Dr. Moniba Iqbal  
( PGTs Community Medicine)

4

### Vision /Mission of RMU:

- To impart evidence based research oriented medical education
- To provide best possible patient care
- To inculcate the values of mutual respect and ethical practice of medicine

2

### SEQUENCE OF LECTURE:

- Learning objectives (1 slide)
- Core subject (41 slides)
- Horizontal Integration, not relevant
- Vertical Integration, (1 slide)
- Digital library references  
Research (1 slide), Ethics(1 slide)
- End of lecture Assessment (04 slides)

5

## REPRODUCTION MODULE

 <p><b>VISION</b></p> <p>Highly recognized and accredited centre of excellence in medical education, using evidence-based teaching techniques for development of highly competent health professionals, who are lifelong committed learner and life service accountable.</p>	 <p><b>MISSION STATEMENT</b></p> <p>To impart evidence based research oriented health professional education in order to provide best possible patient care and to inculcate the values of mutual respect and ethical practice of healthcare and social accountability.</p>	 <p><b>CORE VALUES</b></p> <ul style="list-style-type: none"> <li>✓ Worth</li> <li>✓ Mutual of Excellence</li> <li>✓ Integrity</li> <li>✓ Diversity &amp; Inclusivity</li> <li>✓ Social Impact</li> </ul>
---	--	--

3

## Learning Objectives

- Explain population pyramid
- Read and interpret a population pyramid
- Identify and interpret population pyramids in different stages of growth
- Identify and interpret different types of population pyramids with respect to shape
- Explain any asymmetry in shape
- Identify baby boom in population pyramid
- State importance of population pyramids
- Calculate and interpret dependency ratio
- Explain age and sex composition of a population
- Calculate sex ratio from a given data

6

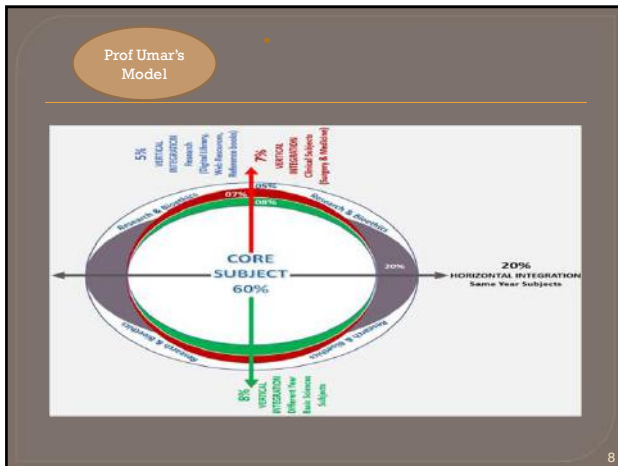

## SGD: TEACHING STRATEGY

Sr.No	Headings	Approximate%
1.	Title Of SGD	
2.	Learning Objectives from Study Guides	
3.	Core Concepts of the topic	95%
4.	Related Advance Research points	3%
5.	Related Ethical points	2%

7

10

8

## WHAT IS A POPULATION PYRAMID

Core concept

- Is a pictorial representation of the age sex composition of a population
- Age pyramid

11

Core concept

9

Core concept

- It is a diagram that gives information about the proportion of males and females in each age group.
- Also shows:
  - - proportion of young people (0 -14 )
  - - proportion of working people (15 – 59)
  - - proportion of elderly people (60+)

12

13

16

14

### HOW TO READ A POPULATION PYRAMID

Core concept

- Read the title of the country
- Comment on general shape of the pyramid
- Note the proportion of people in various age groups
- Note the sex ratio
- Interpret the data

17

17

Core concept

- In a population pyramid each age-variable is presented in the form of a histogram, the two gender histograms are plotted horizontally back-to-back
- On the left for males and on the right for females.
- On the y-axis are age groups: the subintervals are usually five-year age groups; on the x-axis is the number of males/females or the corresponding proportion.

15

15

Core concept

- Width of the base:**  
Birth rate varies with width of the base, a wide base indicates a high birth rate and a narrow base indicates a low birth rate

Population Pyramid

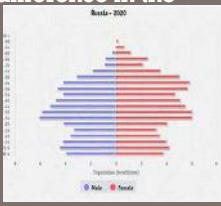

age

18

18

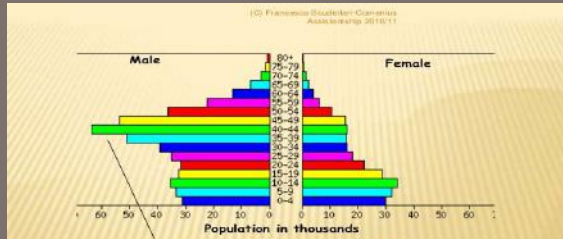

Core concept

- Symmetry:**
  - Statistically speaking pyramids should be relatively symmetrical
  - Any asymmetry indicates a difference in the male and female population
  - This pyramid shows more females at age ranges above 50 which indicates that Women are living to older Ages than males.

19

Core concept

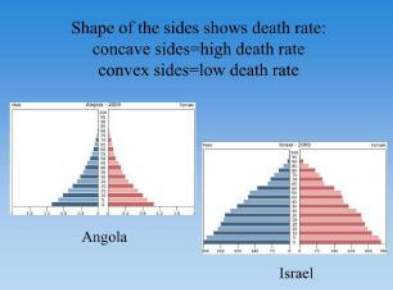

This country has a large number of temporary workers. These are people who migrate here especially to find a job.

22

Core concept

### Shape of sides:

Shape of the sides shows death rate:  
 concave sides=high death rate  
 convex sides=low death rate

Angola

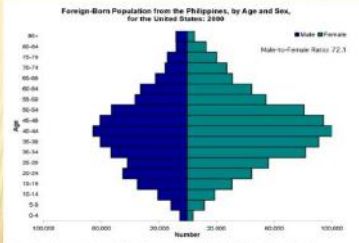

Israel

20

Core concept

e.g. of male labour influx:  
 2000: Qatar  
 2005: Dubai,

e.g. of female labour influx:  
 2000: USA (from The Philippines)

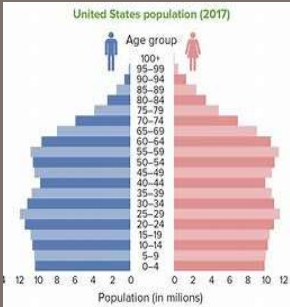

23

Core concept

### Bumps in the sides:

- Bumps in the sides indicate a demographic anomaly

21

Core concept

### BABY BOOM

- When large proportion of women in a population have children in the same years typically due to some critical event like war

24

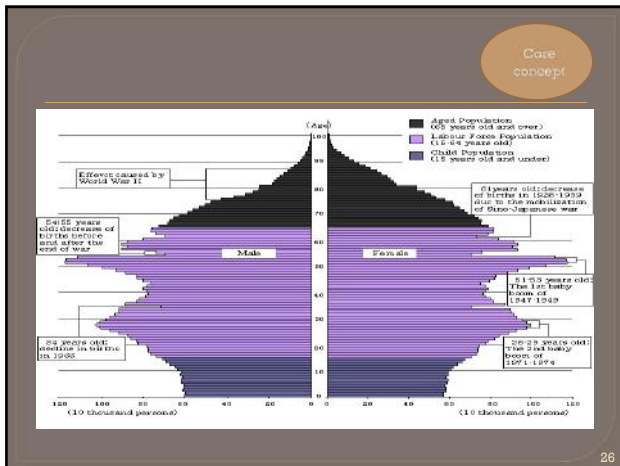

25

Core concept

## TYPES OF POULATION PYRAMIDS

1. Triangular-shaped
2. Beehive-shaped Pyramid
3. Rectangular-shaped Pyramid

28

26

Core concept

## What is the difference in these pyramids

29

27

30

Core concept

- **Title:** India, 2000
- **Shape:** Broad Base - high birth rates
- **Narrow Top** - small elderly pop
- - high death rate
- **Proportion:** - Large proportion of young
- - high young dependency ratio
- **Sex Ratio:** Balance pyramid - Balance sex ratio

31

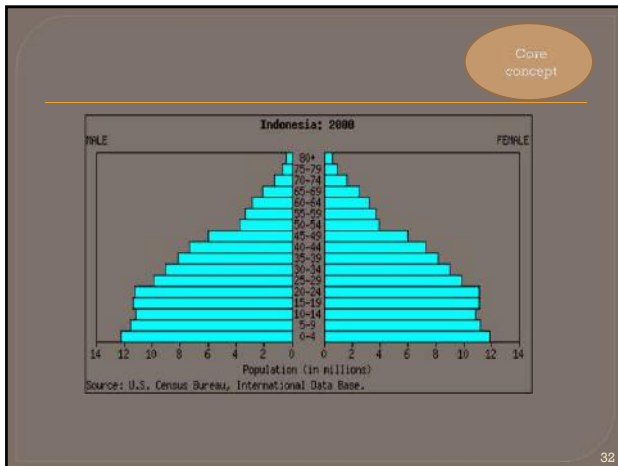

31

Core concept

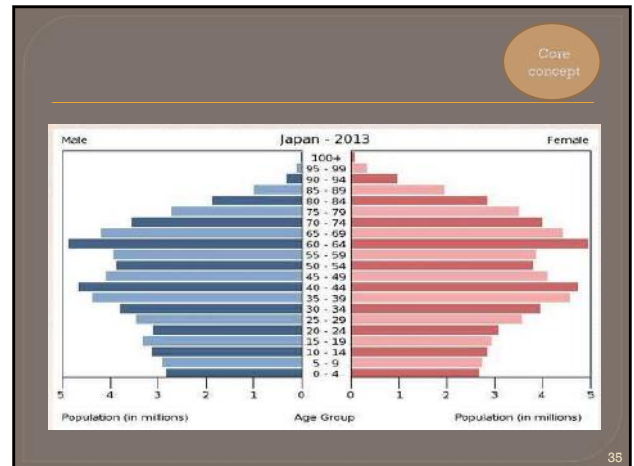

- **Title:** Singapore, 2000
- **Shape:** Rocket-shaped / Narrow Base
- - Low Birth Rates, Slow pop growth
- **Proportion:** Large proportion of working population, 15-59 yr old - large group of economically active pop
- **Sex Ratio:** Balanced pyramid

34

34

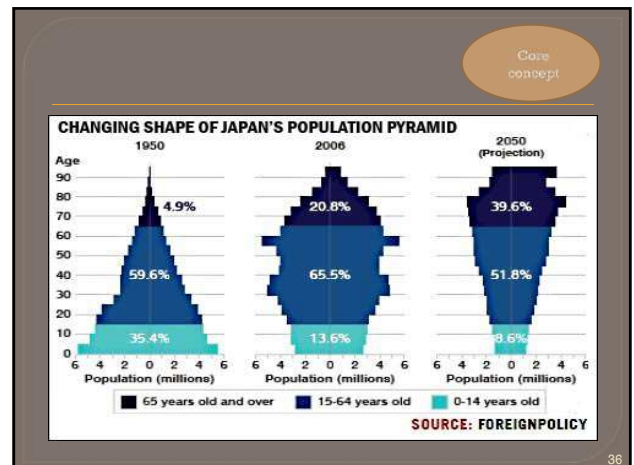

32

35

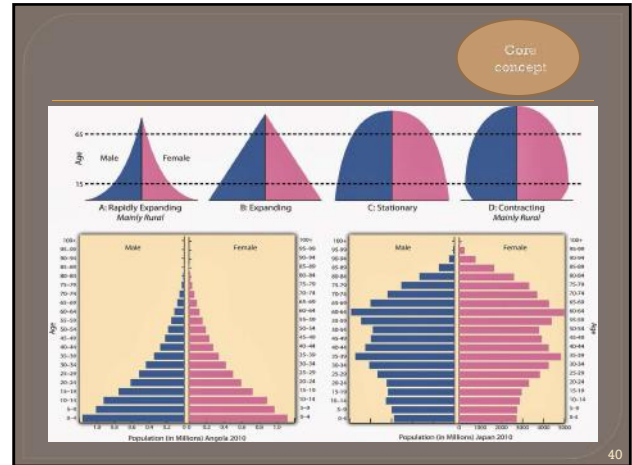

33

36

37

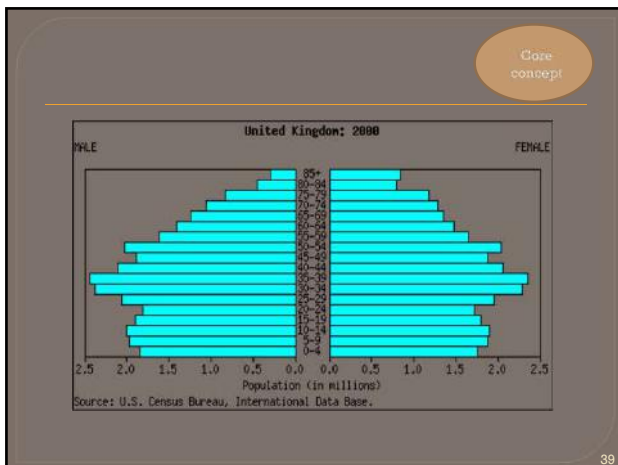

40

- ### Core concept
- **Title:** Netherlands, 2000
  - **Shape:** Rectangular-shaped - Zero Pop Growth
    - Narrow Base - Low Birth Rates
    - - Life-expectancy is high e.g. 80+
    - - Low death rates
  - **Proportion:** Bars of equal length - Balance Proportion
  - **Sex Ratio:** Balance pyramid - Balance Sex Ratio

38

- ### Core concept
- ## IMPORTANCE
- Policy Planning
    - ~ future housing estates
    - ~ future schools
    - ~ future jobs
  - Comparison with other countries
    - ~ developed (US) vs developing (Pakistan)

41

39

- ### Core concept
- ## A BROAD BASE POPULATION PYRAMID MEANS
- Increase food production.
  - Build more homes and schools
  - Plan for more job opportunities for the young in future.
  - Implement birth control campaigns

42

**A NARROW BASED POPULATION PYRAMID MEANS**

Core concept

- Work out incentives to encourage more births.
- Hiring foreign labor.
- Proper medical services and health care for the aged

43

43

**MOMENTUM OF POPULATION GROWTH**

Core concept

This Pyramid shows the age distribution in 1988. This Pyramid shows the Pyramid in 2005 if the TFR dropped immediately to replacement level.

Source: (MPS)

46

46

44

**DEPENDENCY RATIO**

Core concept

**Children + Elderly X 100**  
 Working Age  
 =  $\frac{\text{Pop below 15} + 65 \text{ \& above}}{\text{Pop 15 - 64 years}} \times 100$

Dependency Ratio of Pakistan = 64.39 in 2011

47

47

45

**AGE -SEX COMPOSITION**

Core concept

Refers to the proportion of males & females in different age-groups. It has a direct bearing on social, economic, health needs of communities or countries. In an "old" population, for example, the society has to arrange for the care of the elderly, & the country's health system must be organized accordingly. In a "young" population, on the other hand, the country has to provide more schools, immunizations, & economic support for the young

48

48

Core concept

## SEX RATIO

- The no. of females per 1000 males (park)
- Ratio of males to females in population.  
Expressed as number of males per 100 females.

Sex Ratio =  $\frac{\text{Number of Males}}{\text{Number of Females}} \times 100$

- **Affected by ????**

49

49

## VERTICAL INTEGRATION:

- Significant predictors of neonatal mortality:
  - Bio-demographic factors
  - Literacy
  - Mode of delivery

[Impact of mothers' socio-demographic factors and antenatal clinic attendance on neonatal mortality\(tandfonline.com\)](https://www.tandfonline.com)

52

52

Core concept

## Population Structure: / Composition:

(Division according to characteristic)  
(E.g:- Sex structure, Age structure)  
ethnic, age, sex (also, how many are non-citizens)

50

50

**Add screen shot**  
**Update from results of latest statistics**

- Population of Pakistan: 231,402,116
- Population pyramid: Triangular shaped
- [Population of Pakistan 2021 - PopulationPyramid.net](https://www.populationpyramid.net)
- [Table of Content \(pbs.gov.pk\)](https://www.pbs.gov.pk)
- <https://www.pewresearch.org/>

53

53

Core concept

Over time, as a country develops, the shape of its population pyramid changes from a triangular shape to a barrel-like shape with straighter edges.

51

51

## ETHICS:

**Add screen shot and few lines from relevant article**

- Population ethics and the prospects for fertility policy as climate mitigation policy
- Beegle, K., Christiaensen, L., Dabalen, A., & Gaddis, I. (2016). *Poverty in a rising Africa*. Washington: World Bank Publications.
- [Introduction: Population and Ethics: Difficult Questions, Global Challenges \(tandfonline.com\)](https://www.tandfonline.com)

54

54

## ASSESSMENT:

### MCQs:

1. As children and the elderly are considered to be dependent on economically productive age group, higher dependency ratio reflects the need for a society to provide for their younger and older population groups. Which statement best describes the term "demographic bonus"?
  - a. It is an inevitable consequence of demographic transition
  - b. It is mostly caused by increased old age dependency ratio
  - c. It is because of decline in fertility
  - d. It does not depend on the pace of decline in family size
  - e. It depends on increase in life expectancy at birth

55

55

### SEQ:

- Q.1
  - a. What is population pyramid?
  - b. What information we can get out of a population pyramid?
  - c. What variables are on x-axis and y-axis of population pyramid?

58

58

2. In 2005, Pakistan crude birth rate was 36 births per 1000 population and the crude deathrate was 9 deaths per 1000 population. What was the population growth rate of the country in that year assuming no in and out migrations?

- a. 2.9 %
- b. 2.8 %
- c. 2.7 %
- d. 2.6 %
- e. 2.5 %

56

56

# THE END

59

59

3. The total number of reported births in Rawalpindi district was 10,000 and deaths was 5000 in the year 2007. By giving these figures we are referring to:

- a. Absolute numbers
- b. Crude birth rate
- c. Growth rate
- d. Crude death rate
- e. Vital index

57

57
