

# **MOTTO AND VISION**

To impart evidence based research oriented medical education
To provide best possible patient care
To inculcate the values of mutual respect and ethical practice of medicine

#### DRUGS USED IN INFERTILITY TREATMENT

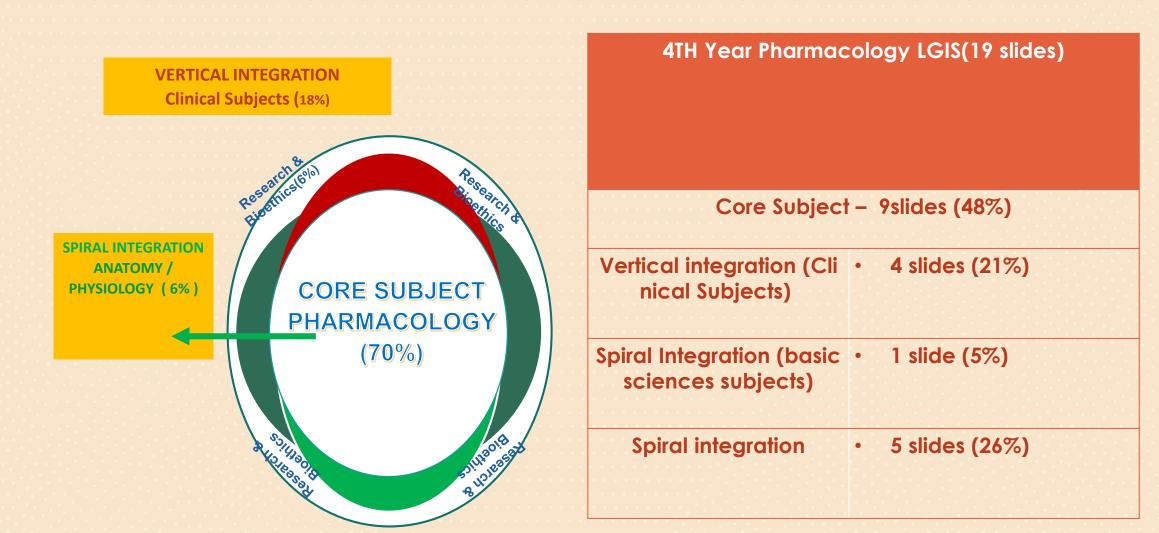

DR MEMUNA KANWAL

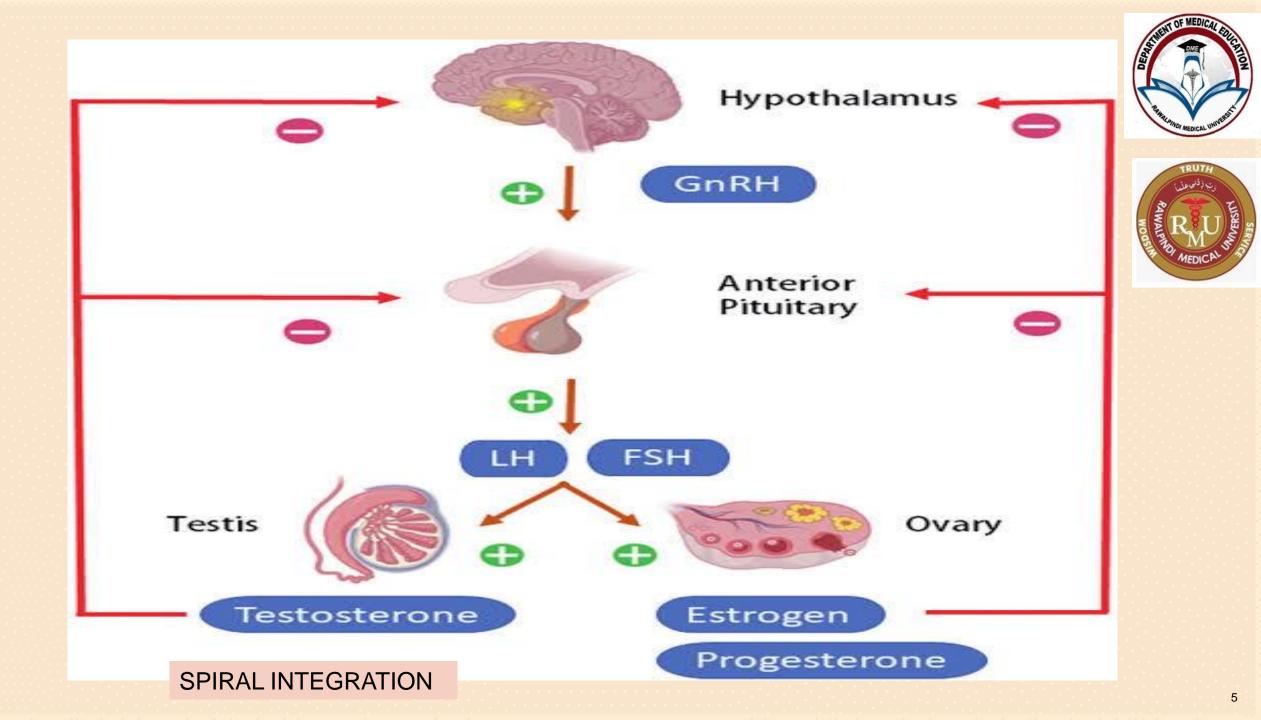

SOURCE : BERTRAM G.KATZUNG BASIC & CLINICAL PHARMACOLOGY 15TH EDITION GOOGLE FOR IMAGES & RESEARCH ARTICLE

#### PROFESSOR UMAR'S CLINICALLY ORIENTED INTEGRATION MODEL FOR INTERACTIVE LECTURES

#### **Common Causes of Infertility**

## Reasons for infertility in women

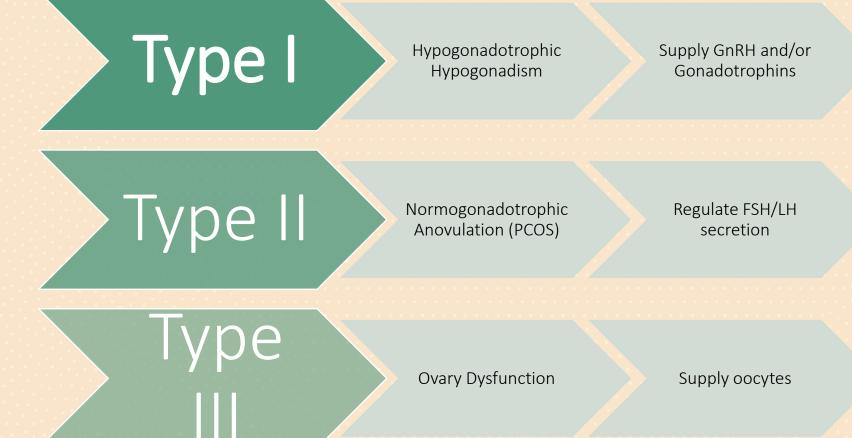

#### VERTICAL INTEGRATION

## **OVULATORY DISORDERS (WHO)**

**VERTICAL INTEGRATION** 

### **DRUGS USED IN INFERTILITY**

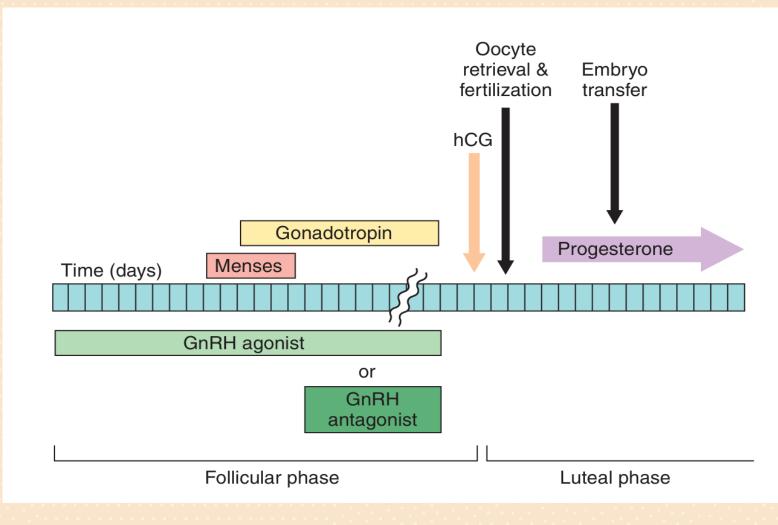

Controlled Ovarian Stimulation	Ovulation Triggers	Hypothalamic- Hypophysis Suppression	· · · · ·	Luteal Phase Support	Others
<ul><li>Clomiphene Citrate</li><li>Gonadotrophins</li></ul>	• HCG • GnRH Analogues	<ul><li>GnRH Analogues</li><li>GnRH Antagonists</li></ul>		<ul><li>HCG</li><li>Progesterone</li></ul>	<ul><li>Metformin</li><li>Aromatase Inhibitors</li></ul>

# **OVULATION INDUCTION PROTOCOLS**

- Ovulation induction with gonadotrophins follow following three steps
- Supression of endogenous gonadotrophins secretion by GnRH analogues/antagonists
- Follicle development by daily injections of FSH, or menotropins
- Final stage of oocyte maturation: LH or hCG injection

#### VERTICAL INTEGRATION

## **GnRH Analogues**

- Leuprolide, Goserelin, Histrelin, Nafarelin, Triptorelin
- Pulsatile release: Stimulate Gonadotrophins release

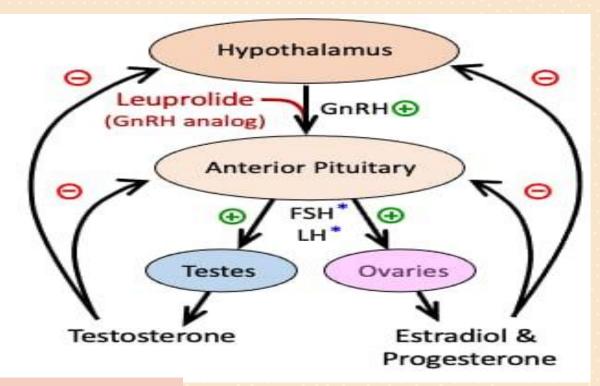

#### Continuous Leuprolide therapy

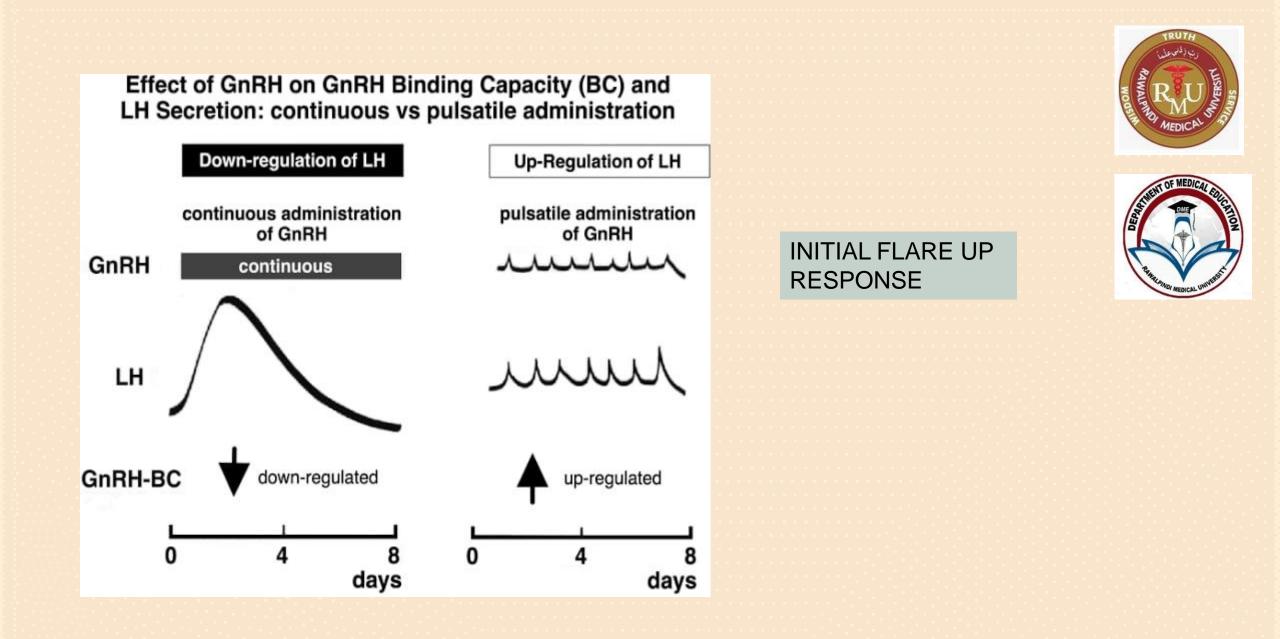

- ↑LH release
- ↑ Estradiol & Progesterone (women)
- ↑ Testosterone (men)

#### Chronic Effect (2-4 weeks) \* GnRH Receptor desensitization Hypogonadism FSH release LH release

- Estradiol & Progesterone (women)
- Testosterone (men)

### **CLINICAL USES**

- Supress endogenous gonadotrophins secretion in women undergoing ovulation induction with gonadotrophins
- Gynecological disorders that benefit from ovarian suppression
   Endometriosis, uterine Fibroids
- Prostate carcinoma
- In pubertal transgender adolscents
- Children with precocious puberty

### **ADVERSE EFFECTS**

#### IN FEMALE

- Hot flushes
- Sweats
- Headache
- Osteoporosis

#### IN MALE

- Hot flushes, sweats
- Gynecomastia
- Reduced libido
- Decreased hematocrit
- Reduced bone density

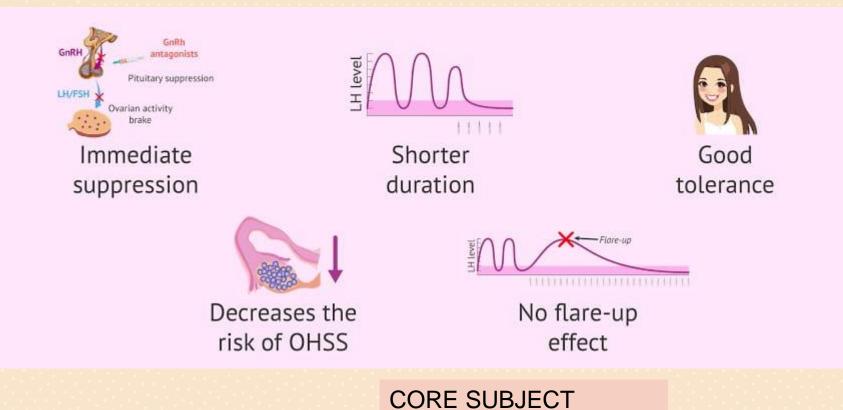

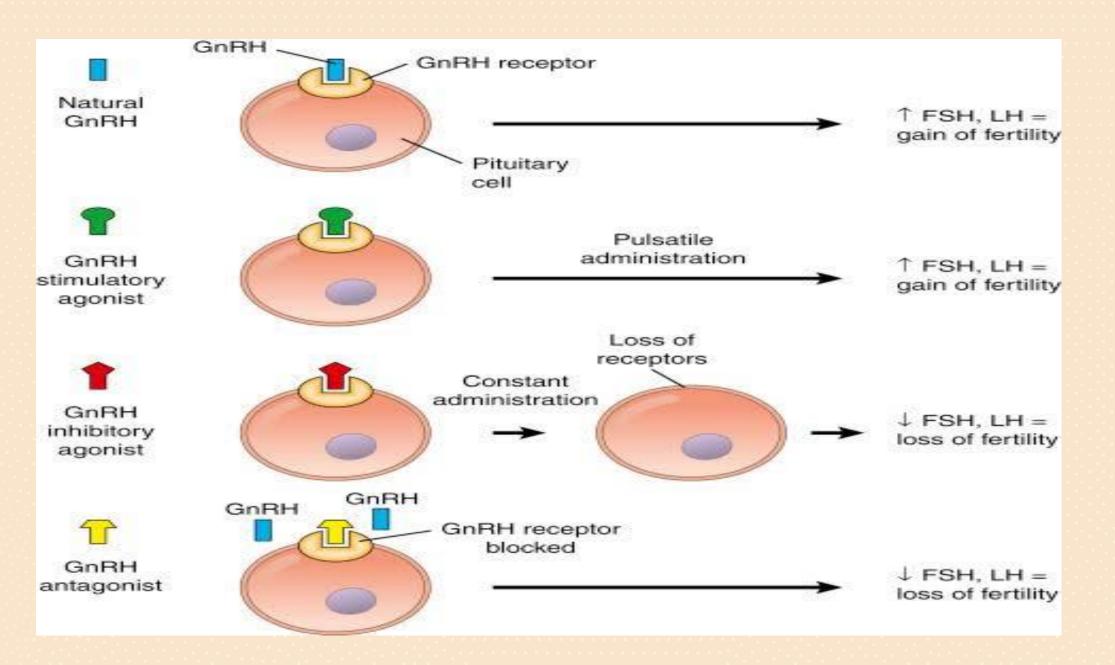

## **GnRH ANTAGONISTS**

- Ganirelix, Cetrorelix, Degarelix
- Degarelix is approved for the treatment of advanced CA Prostate

#### GONADOTROPHINS

#### Menotropins

• Mixture of FSH &LH purified from urine of postmenopausal women

#### FSH and its Analogues

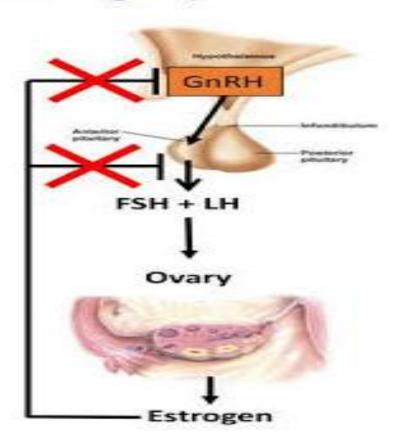

- Urofollitropin: purified preparation extracted from urine of postmenopausal women
- Recombinanat forms: Follitropin alpha, Follitropin beta LH and its Analogues
  - HCG mimic LH action: purified from human urine & recombinanat also
  - Lutropin: recombinant form of LH

# **CLOMIPHENE**

- Agonist at ovary
- Antagonist at hypothalamus and anterior pituitary
- Mechanism of action
  - Prevent estrogen negative feedback of HP-Gonadal axis
  - Promote increased expression of GnRH and gonadotrophins
  - $_{\odot}\,$  Increased production of FSH and LH
  - $\circ\,$  Increased follicular development and ovulation

# **CLOMIPHENE**

# Uses

# • Female infertility due to anovulation

# Adverse effects

- Multiple pregnancies
- Hot flashes

CORE SUBJECT+VERTICAL INTEGRATION

#### **OTHER DRUGS**

- Bromocriptine: if cause of infertility is hyperprolactinemia
- Luteal phase support with progesterone
- Metformin
- Letrozole ia an aromatase inhibitor used for ovulation induction

## **FAMILY PHYSICIAN & INFERTILITY**

- Initial assessment and diagnosis
- Education and cousnelling about normal fertility, life style modifications
- Adressing the emotional and psychological issues
- Management of underlying conditions leading to infertility
- Start initial treatment i.e ovulation induction
- Follow up of provided treatment
- Referral to specialist where needed
- Preconception counselling and care

- Access to treatment is poor
- High cost
- Discrimination or society pressure on couple: hasty decisions
- Religious considerations
- Embryo dispositions
- Multiple pregnancies
- Confidentiality and privacy breach risk
- Psychological impact

# **ROLE OF AI IN INFERTILITY MANAGEMENT**

- Diagnosis and assessment
- Personalized treatment plans
- Menstrual cycle tracking and fertility window
- Embryo selection in IVF
- Optimizing dosing schedule
- Analyzing genetic testing
- Predictive analysis of procedure success
- 24/7 chatbot support to patients
- Data integration and research

## **How To Access Digital Library**

■ Go to the website of HEC National Digital Library.

On Home Page, click on the INSTITUTES.

A page will appear showing the universities from Public and Private Sector and other Institutes which have access to HEC National Digital Library HNDL.

Select your desired Institute.

- A page will appear showing the resources of the institution
- Journals and Researches will appear

You can find a Journal by clicking on JOURNALS AND DATABASE and enter a keyword to search for your desired journal.
