Feedback Batch C5

Feedback 3rd year MBBS ---- Gastroenterology rotation BATCH C5

Date: 17TH FEB TO 27TH FEB 2025

Time: 8:00am to 10:30am

Facilitator: Dr.Tanveer Hussain &

Dr.Anam Shakeel

Feedback 1:

Excellent lectures by mam....All necessary info was given and actually helped in final osce exam

Evening classes in both wards and ER were good...We were taught about taking vitals, we observe diff clinical procedure in ER

Exam: was according to LOs and every examiner was encouraging

Overall: best experience and so much learning in gastro ward....The teachers there were v kind and helpful...

Feedback 2:

The experience was amazing. The lectures were informative. I learned alot especially the confidence I gained by interacting with patients.

Mam taught us very well the basics of history and clinical examination. She especially encouraged the active participation of students.

The evening ward rounds especially ER were beneficial.

The osce pattern used in exams enabled me to apply my knowledge in practical setting, identify areas of improvement and learn from my mistakes.

The overall experience was fantastic.

Feedback 3:

I had an amazing experience with the Gastro department! The morning lectures were outstanding, well-organized, and informative. Mam did a fantastic job teaching us the basics of history and physical examination.

However, the evening sessions were slightly disorganized, and we lacked a dedicated teacher. I suggest incorporating procedural teachings, similar to the morning sessions, and covering specific topics.

The test was well-conducted, and overall, this was the best learning experience I've had, with great interaction. Thank you so much, Gastro department, for this wonderful opportunity

Feedback 4:

Morning classes: 10/10 , Evening classes: 10/ 10

Ward test: 9/10 (Some teachers asked about diagnosis and causes of different diseases)

Overall experience: 10/10

Feedback 5:

Tutors conducted interactive sessions with well-structured clinical case discussions. Their bedside demonstrations reinforced our knowledge, making the learning process highly effective.

The ER exposure provided hands-on experience with diverse cases like GI bleeding, Jaundice and DCLD. The supervising doctors guided us well, allowing observation and assistance in procedures.

The assessment was fair and relevant. The rotation was well-organized

Feedback 6:

Super interactive sessions with a supportive and cooperative HOD and instructor, providing ample opportunities for learning.

Variable experience: limited supervision in the ER hindered learning, whereas the ward provided valuable learning experiences.

Well-structured assessments that effectively evaluated my clinical skills (which are weak), highlighting areas for improvement.

A valuable first-ward experience for me, laying the foundation for history-taking and professionalism. Appreciated the enthusiastic instructors, enjoyable exam experience, and warm hospitality (including tea break)!

Feedback 7:

I had an exceptional learning experience during the morning classes, with clear explanations and hands-on practice of history-taking and examination skills.

The evening ward rounds in the Emergency Department were highly beneficial, providing invaluable experiential learning.

The OSCE exam pattern was also extremely helpful, enabling practical application of knowledge and identifying areas for improvement.

Feedback 8:

Alhumdulillah had a great experience having Gastroenterology as our first clinical rotation

Morning classes were beneficial in helping us to integrate our previous knowledge clinically and learn the basics of how to deal with patients

Found emergency evenings more interesting as we were able to see the clinical procedures being done and the management of critical patients

Examination pattern was helpful in making me realize my weak areas and work on improving my skills

Feedback 9:

It was an excellent learning experience. The faculty maintained a perfect balance of discipline and a supportive teaching environment. They were dedicated to ensure we gained good clinical knowledge. Their teaching was engaging. I truly appreciate their efforts and the welcoming atmosphere they created for us

Feedback 10:

Everything was great

Learnt a lot in morning classes and evenings as well

Evening in ER was good but ward evening was not that much beneficial

Exam conduction was great

Feedback 11:

My gastro ward rotation was an invaluable learning experience. I gained hands-on experience with endoscopies, managed complex cases, and developed essential communication skills. The supportive team and enthusiastic consultants fostered a conducive learning environment, enhancing my knowledge and confidence in gastroenterology.

Feedback 12:

The overall experience is very nicee. Really enjoyed taking classes

The faculty was very cooperative and learned very much from them

Feedback 13:

The morning classes were excellent. The sessions were well-organized, engaging, and really helped in understanding clinical concepts. The teachers explained things well, and the cases we got to see reinforced what we had learned in theory. Overall, it was a great learning experience.

Feedback 14:

The evening experience was good; however, certain improvements are needed. Due to the high patient influx and the hustle and bustle in the emergency department, we were often unable to gain structured learning experiences. A more organized approach, such as assigning specific cases for students to follow or having dedicated teaching moments amidst the clinical workload, would significantly enhance the learning process.

Feedback 15:

The OSCE was well-conducted and covered essential clinical skills. The stations were relevant and tested our ability to apply knowledge in a practical setting. The exam felt fair, and the experience was helpful in identifying areas where we need to improve.

Feedback 16:

The ward rotation was definitely a valuable experience. The morning sessions were very useful, but the evening shifts could be improved with better structure and more hands-on opportunities. A little more guidance during busy hours in the emergency would help us make the most of our learning.

SUMMARY:

OVERALL POSITIVE FEEDBACK

Evening sessions can be improved for next batches.

Feedback Batch C1

Date: 3rd MAR TO 13TH MAR 2025

Time: 8:00am to 10:30am

Facilitator: Dr.Tanveer Hussain &

Dr.Misbah Noureen

Feedback 1:

It was a wonderful experience regarding gastro ward everything was well explained .maximum patient exposure was provided overall it was an excellent effort made by the teachers. We learned new things.

Regards

Kainat Khalil

Roll no 164

Feedback 2:

Our experience in the gastro ward was exceptional. Teachers facilitated us excellently with ample patient exposure both in ward and ER taught us a lot of valuable skills that we will definitely need in future practice

However more chances to observe Procedures would be appreciated in future

Thank you for your effort and commitment to improve this rotation

Feedback 3:

The experience of gastro ward was very helpful and knowledge full. It can be more effective if teachers take history in front of us one or two times. Overall it was great, we learned a lot.

Very thankful to facilitators for being such nice teachers.

Feedback 4:

I had the opportunity to attend the Gastroenterology ward at Holy Family Hospital, where I received excellent training in history taking and clinical examination. The teaching staff demonstrated a high level of professionalism, ensuring a structured and comprehensive learning experience.

The hands-on approach and interactive sessions helped enhance my clinical skills, and the faculty's guidance was invaluable in understanding patient assessment. The environment was conducive to learning, and the team was approachable and supportive.

Overall, my experience in the Gastro ward was highly beneficial, and I appreciate the dedication of the staff in providing quality medical education.

Regards

Huzaiifa Ahmad

Roll no.144

Feedback 5:

Although wasn't able to attend second week half due illness but the days i took ward, it was a best and nice experience ✨

Learnt alot in those days and it motivated me to perform best ✨

Regards

Laiba Razaaq

178

Feedback 6:

I had a valuable learning experience in the Gastroenterology ward at Holy Family Hospital. Learned a lot of new things first time interacted with patients. The faculty was professional, supportive, and dedicated to medical education. Overall, it was a beneficial and enriching experience ✨

Regards

Ahmed saleem

158

Feedback 7:

We had a very professional experience in our gastro ward. The teachers were all very helpful.

We learned a lot about examination and history taking.

Blessings for all the teachers

Roll no 142

Feedback 8:

Gastro ward was incredibly insightful and a highly valuable learning experience. Everything was ran smoothly and the practical demonstrations on history taking and physical examination were much up to the mark.

Regards

Faez Nazir 151

Feedback 9:

Gastroenterology ward proved to be an engaging introduction to the real-life interactions between doctors and patients. Whether it was HOD, PGs, or HOs, each of them taught us something, both in terms of clinical knowledge and patient interaction. This experience makes me look forward to upcoming clinical ward rotations.

Feedback 10:

Feedback on Attending the Ward

I had a very positive experience attending while attending gastroenterology ward. The ward was well-organized, clean. I got to learn many new things. Our facilitators were quite friendly and compassionate attitude which make significant impact on learning.

Overall, I truly appreciate the dedication of the gastro ward team.

Feedback 11:

If I have to rate my experience in gastro ward I would rate it 4/5. I have learned a lot of practical things. I am totally satisfied with the experience. All of the teachers and nursing staff were very cooperative and helped us grow. I would like to thank gastro team their fine service.

From Batch C1 Durre Shehwar
